Construction: What to Expect and When

Phase 2 Project Sequence

Underground Design and Construction

Surface Design, Public Input, and Construction

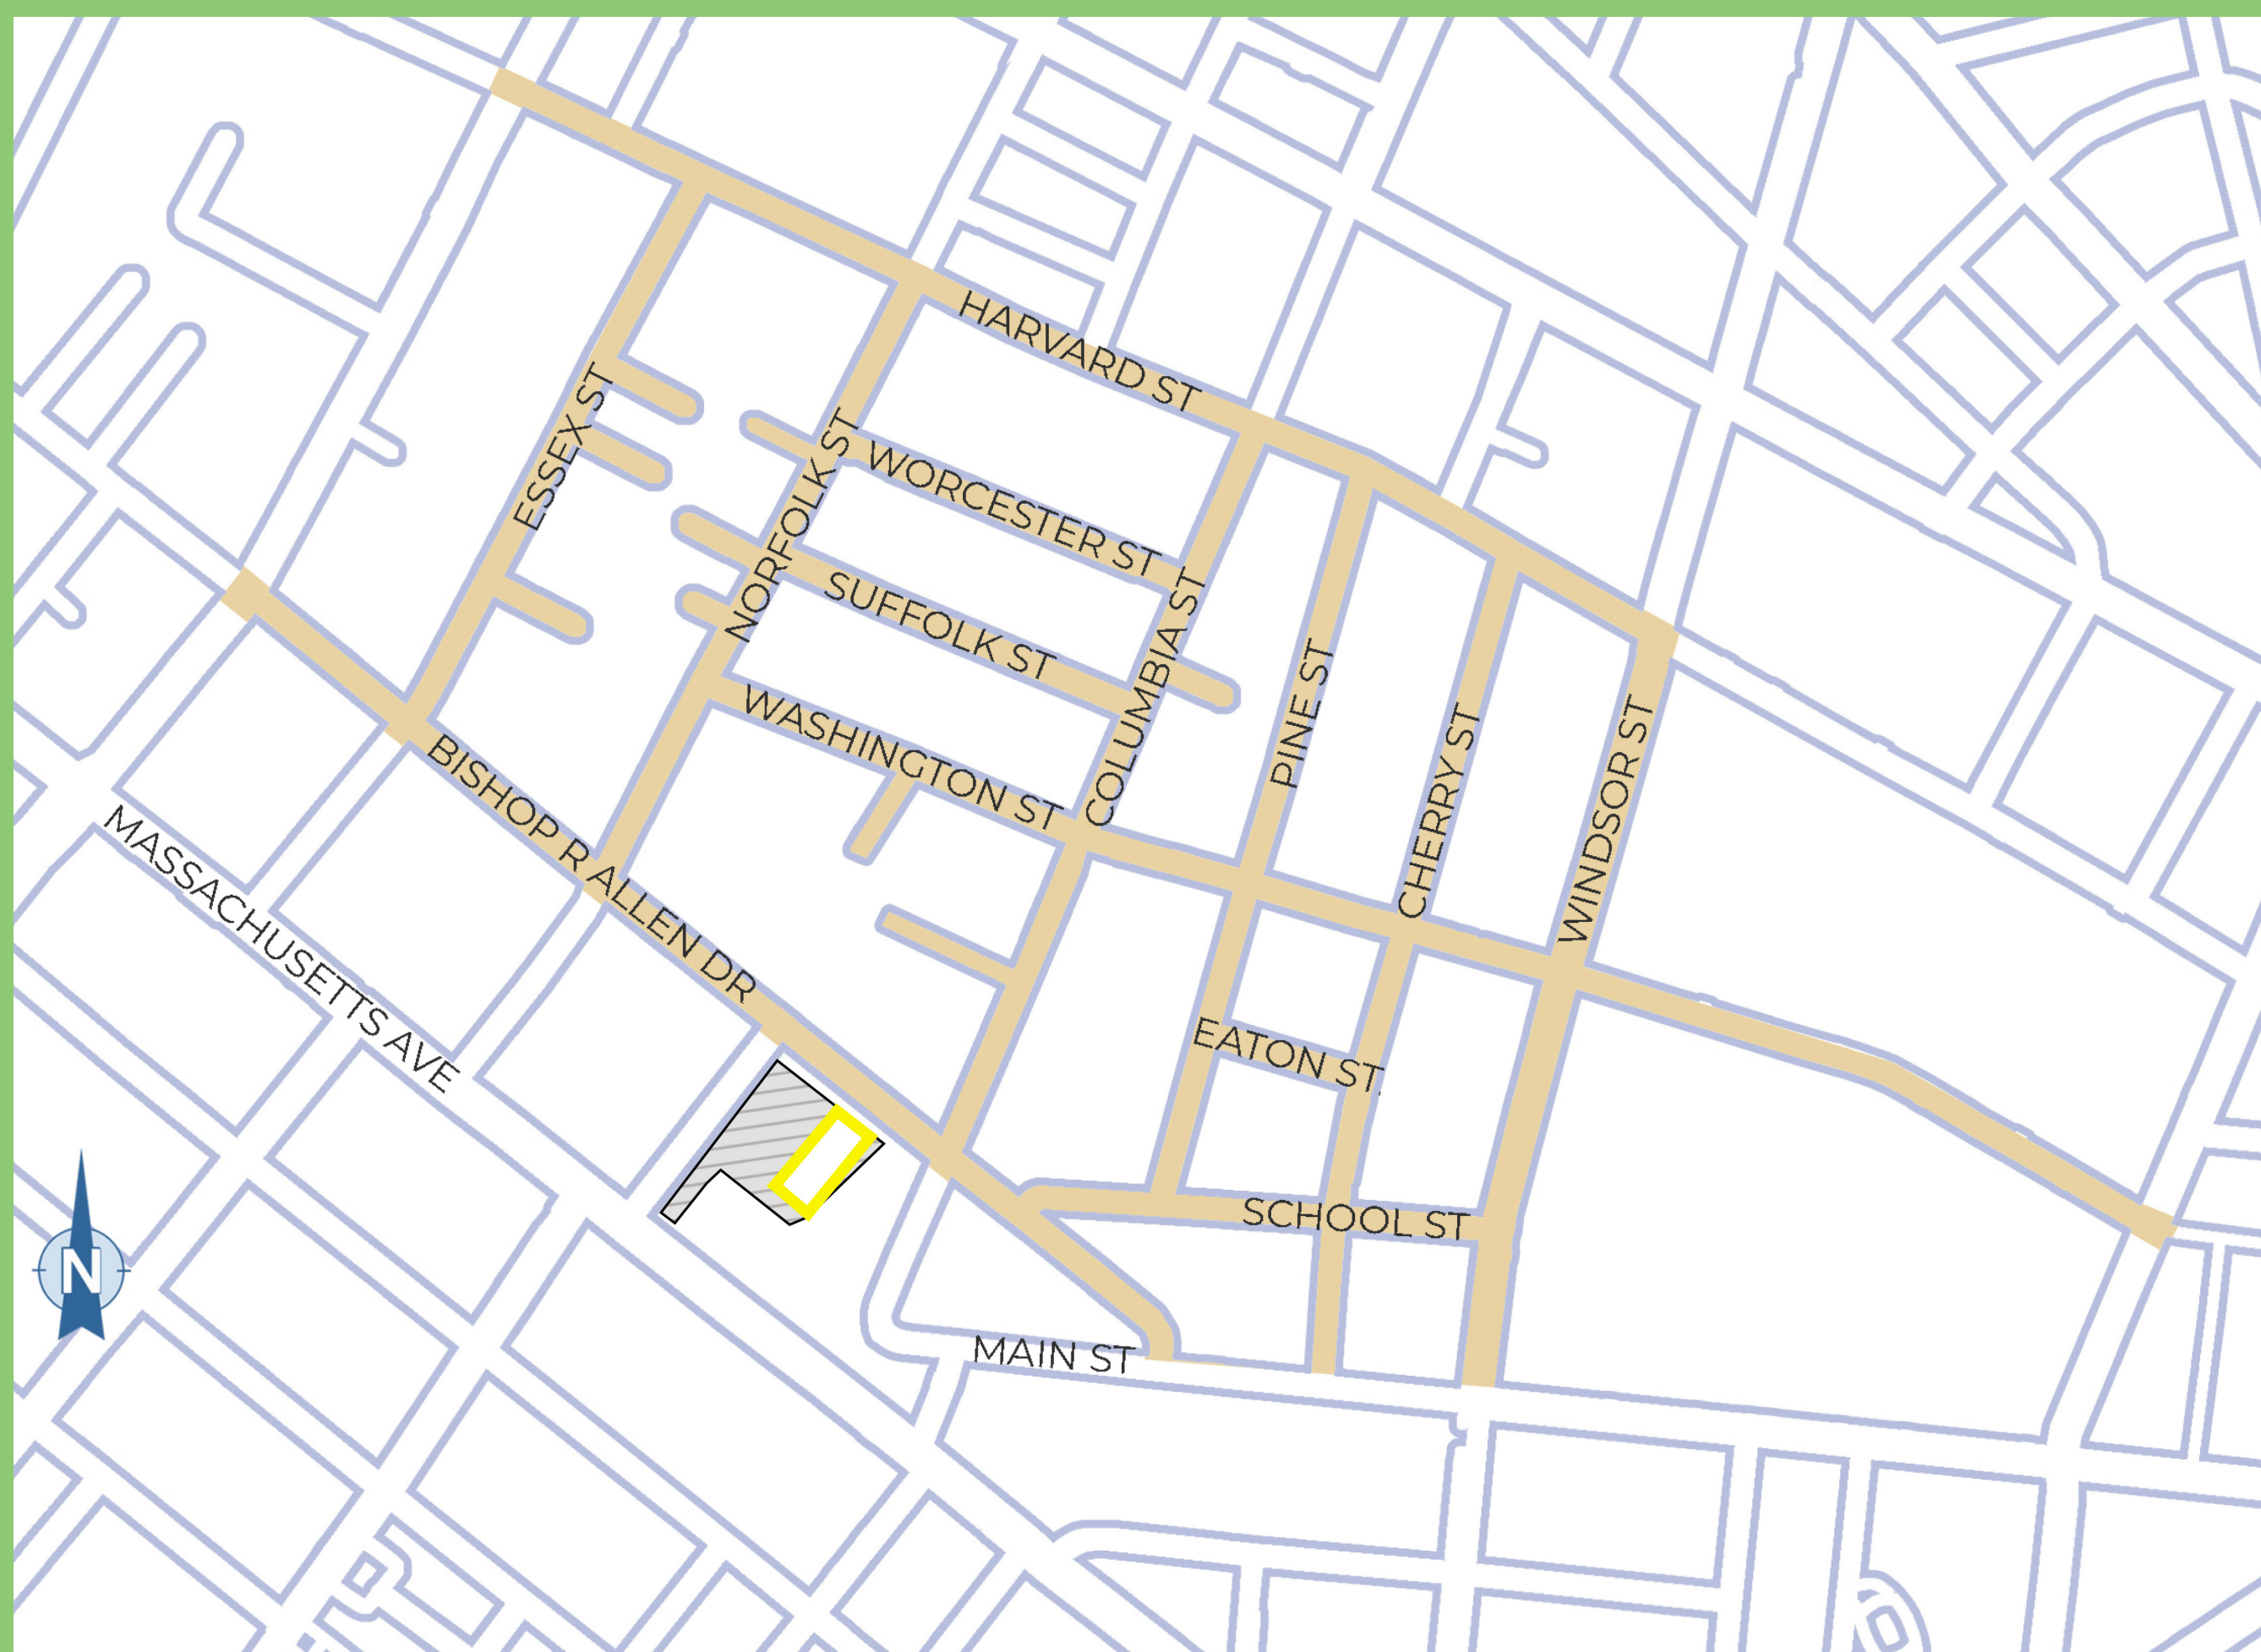

Underground Work:

- Options mostly driven by space and engineering needs
- Sequenced and coordinated utility work
 - Gas (current work by Eversource)
 - Water
 - Sewer/drain

Surface Work

- Strongly guided by neighborhood input & needs, community conversations
- Currently developing options for community feedback
- Design while doing underground work

Streets Where Work is Expected

Sewer separation in Cambridge
