

Cambridge St Safety Improvement Project

Businesses, we want to hear from you!

Street Layout Changes

The City of Cambridge will add separated bike lanes and make related safety improvements on Cambridge Street. We will:

Install Separated Bike Lanes

New bike lanes will be added along the curb and separated from traffic by a physical barrier.

Improve Roadway

Upgrades to utilities, street repaving, and reconstruction of curb ramps, crosswalks, and sidewalks will be needed in select locations.

Reduce Parking

This project will reduce parking by 60%, with parking only on one side of the street.

We Want to Know

Parking will be reduced to one side of the street.

- What are your parking and loading needs?
- What are your transportation needs or safety concerns?
