DATE : August 11, 2026

SUBJECT: Environmental Conditions Summary
Cambridge Combined Sewer Overflow Long Term Control Plan
41 Bellis Circle
Cambridge, Massachusetts

CC: Hannah Kominske, PE, Kleinfelder
Mark Ruberti, PE, Kleinfelder
May Sharif, PE, Stantec
David VanHoven, Stantec

This memo summarizes environmental conditions and provides recommendations for soil and groundwater management to support the design associated with the City's combined sewer overflow (CSO) long term control project which includes the 41 Bellis Circle parcel (referred to as the Site). The Site is planned to be developed as a vertical Department of Public Works (DPW) facility with an underground wet weather storage tank and pump station to mitigate CSOs in the vicinity.

Kleinfelder reviewed information presented in databases maintained by state and federal agencies including aerial photographs, city directories and Sanborn fire insurance maps, as well as publicly available reports associated with Massachusetts Department of Environmental Protection (MassDEP) Massachusetts Contingency Plan (MCP) Disposal Sites. Additionally, a preliminary subsurface investigation was performed for geotechnical and environmental purposes. Soil observations, field screening data, and analytical results of soil samples are summarized in this memo.

Environmental Database Review

An ASTM Phase I Environmental Site Assessment (Phase I ESA) was completed by Kleinfelder in July 2023 on behalf of the City of Cambridge for due diligence associated with the purchase of the 41 Bellis Circle property. Findings of the Phase I ESA were presented to the City in a report dated August 11, 2023, which is provided as **Appendix A**. As part of the Phase I Kleinfelder contracted a commercial database service, Environmental Data Resources, Inc (EDR), of Milford, Connecticut to perform a government database search for listings within the Site, and to provide historical photographs and maps. Below is a summary of the results of the database search provided in the Phase I ESA report. Copies of the EDR and historical documentation are provided in the Phase I ESA in **Appendix A**.

Sanborn Maps

The EDR report included historical Sanborn maps of the Site for the years 1900, 1935, 1950, 1986, 1990 1992, 1995, 2003, 2004, 2005, and 2006. Sanborn maps were reviewed to identify conditions posing potential environmental risks within the Site. In 1900, Sanborn maps depicted the Site as "W Cambridge Depot" with a structure in the eastern portion and two railroad spurs in the western portion. In 1935, the property is labeled as "Diamond Coal Co" with a coal shed, open coal bin and office building. In 1950 three additional structures are present, one to the west of the coal shed and one in the eastern portion. It is difficult to determine the writing on the structure adjacent to the coal shed, but one of the two new structures in the eastern portion is labeled "Pump Shed." There is also a fuel oil tank present to the north of the office. Bolton Street is labeled John F. Bellis Circle beginning with the 1950 map. Beginning in 1986, the Site is depicted as vacant land with the railroad spurs still present; however, the railroad spurs were not present on the 1990 Map.

Aerial Photographs

Coverage for the Site was available on historical aerial photographs obtained for 41 Bellis Circle for the years 1938, 1952, 1955, 1969, 1970, 1978, 1980, 1987, 1995, 2006, 2010, 2014, and 2018. These photographs were reviewed to identify conditions posing potential environmental risks within the Site. The photographs depict the project area to be developed as early as 1938, with multiple structures present that correspond with the Sanborn maps. Beginning in 1952, the Site appears to have additional structures on it, that also correspond with the Sanborn maps. The 1970 photograph depicts all structures removed, with the exception of one, which was removed sometime between 1970 and 1980. In 1987 the Site appears as a paved parking lot.

Historical Topographic Maps

Coverage for the Site was available on historical topographic maps obtained for 41 Bellis Circle for the years 1893, 1903, 1943/1944, 1946/1947, 1949, 1956, 1970/1971, 1977, 1979, 1985/1987, 2012, 2015, and 2018. The topographic maps depict heavy development in the vicinity of Site as early as 1893. The 1903 historical topographic map shows a terminated rail line at the Site. No other significant features were noted on the topographic maps for the Site. Beginning in 1943/1944, the current Danehy Park, a former landfill located to the west, south and southwest of the Site is depicted as a clay pit.

City Directories

The EDR Report included city directories for the years 1896, 1901, 1906, 1910,1944, 1954, 1960, 1965, 1970, 1975, 1984, 1989, 1992, 1995, 2000, 2005, 2010, 2014 and 2020 for 41 Bellis Circle. The Site was not listed in the EDR City Directory.

Copyright 2026 Kleinfelder

Records Review

The purpose of the records review is to obtain and review records that would help to evaluate potential environmental concerns in connection with the Site and surrounding properties. Federal, State and local regulatory agencies publish databases or "lists" of businesses and properties that handle hazardous materials or hazardous waste or are the known location of a release of hazardous substances to soil and/or groundwater. These databases were reviewed through the EDR report for Kleinfelder's 2023 Phase I and updated as part of this assessment using MassDEP online records. Release tracking numbers (RTNs) for sites within or adjacent to the Site with the potential to impact the Site are discussed below, listed in **Table 1**, and shown on **Figure 1**. Sites for which a Class A-1 Response Action Outcome (RAO) statement was submitted, indicating that the site has been remediated to background conditions, were not included.

41 Bellis Circle

A 120-day notification was reported to MassDEP on August 1, 2016 for a release of oil observed in soil during a Phase II Environmental Site Assessment (Phase II ESA) and RTN 3-0033725 was assigned. Concentrations of extractable petroleum hydrocarbons (EPH) and volatile petroleum hydrocarbons (VPH) exceeded MCP Reportable Concentrations (RCs) for Category S-1 soils (RCS-1) in soil samples collected from a depth of five to 10 feet below ground surface (bgs) in a soil boring advanced during the investigation. Concentrations of VPH, EPH and volatile organic compounds (VOCs) were also detected in groundwater; however, these concentrations were below the applicable MCP RCGW-2 that applies to the Site. The Phase II also included a ground penetrating radar (GPR) survey and no anomalies indicating the presence of an underground storage tank(s) (USTs) were observed.

A supplemental Phase II was subsequently conducted to evaluate extent of impacts to soil and further evaluate groundwater at the Site. Results of soil samples collected from additional borings concluded that the release was likely attributed to a fuel oil tank associated with heating oil sales by the Diamond Coal Company, a former Site occupant. The USTs were reportedly removed in the early 1980s.

Polycyclic aromatic hydrocarbons (PAHs) commonly found in historic fill material were also identified above MCP RCS-1 during the supplemental Phase II investigation. Field observations noted the presence of coal and coal ash in soil at the Site thus release notification was not required per the MCP at 310 CMR 40.0317(9). The supplemental Phase II investigation did not detect any groundwater impacts.

In August 2016, an approximately 60-foot by 60-foot area of petroleum contaminated soil was excavated from the parking lot under a Release Abatement Measure (RAM) Plan. The average depth of the excavation was approximately 13 to 15 feet bgs. Some areas extended to a depth of approximately 18 feet bgs. A total of 21 endpoint soil samples were collected from the sidewalls and base of the excavation and submitted for laboratory analysis of EPH and VPH. Results indicated residual concentrations of VPH and EPH above applicable Method 1 S-1 soil standards in localized areas in the southern, western and northern sidewalls; however, the Licensed Site Professional (LSP) of record determined that the benefit of additional excavation in these areas to reduce concentrations was not feasible in accordance with the MassDEP's Policy #WSC-04-160,

Copyright 2026 Kleinfelder

Conducting Feasibility Evaluations under the MCP. Samples collected from the northern sidewall and base of the excavation did not detect VPH or EPH above laboratory reporting limits and/or applicable Method 1 S-1 soil standards. A total of 2,893 tons of contaminated soil were excavated and transported for off-site recycling.

Following soil excavation, additional soil borings and groundwater monitoring wells were installed to delineate soil endpoint sample results and assess groundwater in areas of residual contamination as well as the potential for off-site migration. Soil sample results detected VPH and EPH constituents above laboratory reporting limits, but below applicable standards. No groundwater concentrations detected exceeded the applicable Method 1 GW-2 or GW-3 standards.

Following post-excavation soil and groundwater sampling a Method 1 Risk Characterization was performed. Results of the Method 1 Risk Characterization determined that a condition of No Significant Risk existed and a Permanent Solution with No Conditions (PSNC) was submitted by EBI Consulting in October 2016. A copy of the PSNC is provided in **Appendix B**.

147 Sherman Street

There are two RTN's associated with 147 Sherman Street, which is located approximately 111 feet northeast of the Site. The first RTN 3-0014286 is for a 120-day notification on October 1, 1996, for the release of chlorinated solvents related to electronics manufacturing. Following injections to reduce VOCs in groundwater in two localized areas outside to the south side of the eastern portion of the building, a Class A-2 Response Action Outcome Statement (RAO) was submitted to MassDEP. The MassDEP audited the RAO in 2007 following policy changes and multiple rounds of indoor air sampling were conducted to evaluate conditions. A sub slab depressurization system (SSDS) was installed to mitigate vapor intrusion conditions. In January 2014 a Class C-1 RAO was submitted. An Activity and Use Limitation (AUL) was placed on the property specifying the continued operation of the SSDS. A Permanent Solution with Conditions (PSC) was submitted in July 2017, requiring the ongoing operation of the Active Exposure Pathway Mitigation Measure (AEPMM) to maintain a condition of No Significant Risk. The MCP requires that the current property owner submit an annual certification with regard to the operation and maintenance of the AEPMM.

RTN 3-0033114 was assigned for a two-hour notification on August 27, 2015, for the release of approximately 17 gallons of hydraulic fluid from a concrete pumping truck onto asphalt. The oil was subsequently cleaned up and subsurface gravel in areas of large pavement cracks were assessed and determined to be impacted but localized. The impacted gravel was excavated. No soil or groundwater impacts were identified. A PSNC was submitted in November 2015.

Although this property is adjacent, it is separated by railroad tracks from the Site. Further, localized groundwater contamination was not determined to be migrating off-site towards the Site. Based on this information and the current status the property is not likely to affect the Site.

85 Bolton Street

Copyright 2026 Kleinfelder

This facility is located approximately 620 feet east-southeast of the Site and was assigned RTN 3-0000275 on January 1, 1987, as a Location to Be Investigated (LTBI). An assessment conducted on the property identified low level impacts to soil and groundwater; however, upon review of the assessment report, the MassDEP issued No Further Action. Based on available information, the contamination associated with RTN 3-0000275 is not likely to affect the Site.

Danehy Park

A Protected Open Space, Danehy Park, is located approximately 130 feet to the west of the Site at its closest point. Historically, Danehy Park operated as a solid waste landfill and prior to the landfill was used as a clay pit. According to the City of Cambridge website the area was predominately clay and between 1847-1952, clay was used to manufacture bricks by the New England Brick Company. The City of Cambridge purchased the site in 1946 from New England Brick Company and used the site as a landfill between 1952 and 1971. In March 1971 the landfill was closed to large scale dumping. Between 1976 and 1982, the site was also used for the placement of excavated material generated from the Massachusetts Bay Transportation Authority (MBTA) construction projects. In February 1990 the City of Cambridge received a final closure permit from MassDEP and the landfill was capped and redeveloped as Danehy Park. Routine landfill monitoring, including semi-annual water quality monitoring and quarterly landfill gas monitoring, has been conducted at the park since 1995.

RTN 3-38051 was assigned for a two-hour notification on March 22, 2023, for the observation of methane concentrations greater than or equal to 10% of the lower explosive limit (LEL) in a subsurface utility conduit. An IRA Plan prepared in accordance with 310 CMR 40.0412 was submitted to MassDEP on May 19, 2023. The IRA Plan included a description of the release, site location and description, summary of response actions completed as of May 18, 2023, and the proposed activities to be conducted to address the reported condition. MassDEP provided written approval of the IRA Plan via email on May 25, 2023. The IRA Completion Report was submitted on January 16, 2025, prepared in accordance with the provisions set forth in the Massachusetts Contingency Plan (MCP) 310 CMR 40.0427. Ongoing activities are considered “Adequately Regulated" under the MCP.

Applicable Soil and Groundwater Standards

The MassDEP has promulgated soil and groundwater reporting standards, referred to as Reportable Concentrations (RCs), in the MCP at 310 CMR 40.1600, the Massachusetts Oil and Hazardous Materials List (MOHML). The RCs are concentrations of oil or hazardous materials that require notification to the MassDEP. When an initial investigation is conducted at a property, these standards are used for data comparison. Excluding spills and imminent hazards, if data for specific compounds is equal to or greater than the RC(s), the MassDEP requires notification within 120 days of knowledge of the detection(s) in accordance with 310 CMR 40.0315(1). If a 120-day notification is required based on an exceedance of an RC then further assessment and remediation, if needed, are required in accordance with the MCP.

There are two reporting categories for soil and groundwater data that are based on proximity to specific receptors. These categories include:

Copyright 2026 Kleinfelder

- Soil Reportable Concentrations
    - RCS-1: The RCS-1 category applies to residential properties and all properties that are located within 500 feet of a residential property.
    - RCS-2: The RCS-2 category applies to properties that are not residential or not located within 500 feet of a residential property.
- Groundwater Reportable Concentrations
    - RCGW-1: The RCGW-1 category applies to groundwater at properties that are located within designated drinking water protection areas or potential drinking water protection areas, or within 500 feet of a private drinking water well.
    - RCGW-2: The RCGW-2 category applies to groundwater at properties that are not located within designated drinking water protection areas or potential drinking water protection areas or are not located within 500 feet of a private drinking water well.

The applicable soil RC for the 41 Bellis Circle property is RCS-1, due to the proximity of residential properties to the site. The property is not located within a drinking water protection area, and there are no drinking water wells within 500 feet of the property; therefore, the RCGW-2 applies to groundwater at the property.

If soil and groundwater compounds are detected below their respective RCs for the property, then notification to the MassDEP is not required. Any contaminants detected below their respective RCs are not considered to pose a significant risk to human health, public safety or the environment pursuant to the MCP.

Preliminary Subsurface Investigation

April 2025

On April 7, 8, 10 and 11, 2025, Kleinfelder advanced four soil borings at the Site (KLF-1 through KLF-4). Borings were selected within the planned work area and are shown in **Figure 1.** Borings were advanced to depths ranging from 26 to 65.5 feet bgs.

Soil samples were continuously collected from the ground surface to termination depth at each boring location and screened for VOCs with a photoionization detector (PID). A total of four soil samples were collected for laboratory analysis as grab and/or composite samples, with the grab samples submitted for VOC analysis. Samples were chosen based on proximity to on-site environmental concerns noted during the historical and regulatory database reviews. Due to the planned construction for site redevelopment involving a deeper excavation to install a stormwater UST, one soil sample was collected to characterize native soil located beneath the historic fill layer (KLF-3, 14 to 18 feet bgs). The other three samples were collected of shallow fill material.

Copyright 2026 Kleinfelder

Soil PID results ranged from below the instrument detection limit to 3.2 parts per million by volume (ppmv) (KLF-3, 8-10 feet bgs). Soil encountered at the Site in borings KLF-1, KLF-2 and KLF-4 include fill material consisting of poorly graded sand with silt and gravel to a depth of two to five feet bgs, underlain by silt and sand to a depth of 10 feet bgs followed by clay. Glacial till was observed at a depth of 63 feet bgs. Soil boring KLF-3 was located adjacent to the 2016 soil excavation associated with RTN 3-0033725. Soils characterized in KLF-3 include fill material consisting of poorly graded sand, gravel and silt to a depth of 14 feet bgs underlain by clay. PID readings and soil descriptions are included in soil boring logs as **Appendix C**.

The soil samples were submitted to Phoenix Environmental Laboratories, Inc. of Manchester, Connecticut (Phoenix) for the following laboratory analyses:

- Total petroleum hydrocarbons (TPH) by Environmental Protection Agency (EPA) Method 8100M
- VOCs by EPA Method 8260B
- Semi-volatile organic compounds (SVOCs) by EPA Method 8270C
- MCP 14 metals by EPA Methods 6010 and 7471
- Polychlorinated biphenyls (PCBs) by EPA Method 8082A with Soxhlet extraction
- Reactivity by EPA Methods 9014 and 9030A
- Conductivity by EPA Method 2510B
- Corrosivity/pH by EPA Method 9045C
- Flashpoint by EPA Method 1010A-B

Metals were detected above the laboratory reporting limits in all soil samples; however, concentrations were below MCP RCS-1. Pyrene, fluoranthene and benzo(b)fluoranthene were detected above the laboratory reporting limits but below the MCP RCS-1 in soil samples collected from KLF-2 (0-5 feet) and KLF-3 (0-5 feet) and therefore do not require reporting to MassDEP. PCB aroclor 1248 was also detected above the laboratory reporting limits but below the MCP RCS-1 in the soil sample collected from KLF-3 (0-5 feet) and does not require reporting to MassDEP. No other analytes were detected above the laboratory reporting limits in these samples. Results of soil samples are provided in **Table 2**, and laboratory analytical reports are attached as **Appendix D**.

A groundwater monitoring was installed during the investigation in soil boring KLF-3, due to its proximity to the remedial excavation conducted in 2016. The monitoring well was constructed to a depth of 15 feet bgs using 10 feet of 2-inch, Schedule 40, 0.010-inch slotted PVC screen and five feet of 2-inch, Schedule 40 PVC riser pipe to just below ground surface. The annual space between the borehole and the screen was backfilled with silica sand to approximately one foot above the screen, followed by a 1.5-foot bentonite seal. The borehole was backfilled to grade using drill cuttings. Surface completion of the monitoring well included a road box secured in concrete. On April 22, 2025, KLF-3 and previously existing well MW-102 were developed using a Waterra pump to remove fine sand and silt from the wells. A total of 50 to 100 gallons of groundwater was purged from the wells. MW-102 was previously installed by CDM Smith between March 19 and 21, 2024 on behalf of the City of Cambridge to further delineate groundwater conditions associated with Danehy Park.

Copyright 2026 Kleinfelder

Groundwater samples were collected from monitoring wells KLF-3 and MW-102 on April 28, 2025, using a peristaltic pump and the EPA low flow method. Prior to sampling, depth to groundwater was gauged using an electronic interface probe. Depth to water in the monitoring wells ranged from 7.51 feet to 7.97 feet bgs.

Groundwater samples were submitted to Phoenix for laboratory analysis of:

- TPH by EPA Method 8100M
- VOCs by EPA Method 8260B
- SVOCs by EPA Method 8270C
- MCP 14 metals by EPA Methods 6010 and 7471 (total and dissolved)
- PCBs by EPA Method 8082A with Soxhlet extraction
- Reactivity by EPA Methods 9014 and 9030A
- Conductivity by EPA Method 2510B
- Corrosivity/pH by EPA Method 9045C
- Flashpoint by EPA Method 1010A-B

Total and dissolved metals and SVOCs were detected above their respective laboratory reporting limits in groundwater samples collected from both KLF-3 and MW-102. Additionally, naphthalene was detected above the laboratory reporting limit in the groundwater sample collected from KLF-3. All detected concentrations were below the RCGW-2 concentrations and therefore does not require reporting to the MassDEP. Results of groundwater samples are provided in **Table 3**, and laboratory reports are attached as **Appendix D.**

March/April 2026

From March 27 to April 2, 2026, Kleinfelder advanced six soil borings at the Site (KLF-101 through KLF-106). Borings were selected within the planned work area and are shown in **Figure 1.** Borings were advanced to depths ranging from 27 to 89 feet bgs.

Soil samples were continuously collected from the ground surface to termination depth at each boring location and screened for VOCs with a PID. A total of five soil samples were collected for laboratory analysis as grab and/or composite samples, with the grab samples submitted for VOC analysis. Samples were chosen similar to the April 2025 subsurface investigation and included collecting samples of fill and native soil.

Soil PID results ranged from below the instrument detection limit to 18.9 ppmv (KLF-102, 8-10 feet bgs). Soil encountered during the April 2026 investigation includes fill material consisting of poorly graded sand with silt and gravel to a depth range of two to ten feet bgs, underlain by silt and sand to a depth range of 11 feet to 39 feet bgs followed by clay. Glacial till was observed as shallow as 59 feet bgs. PID readings and soil descriptions are included in soil boring logs as **Appendix C**.

The soil samples were submitted to Phoenix Environmental Laboratories, Inc. of Manchester, Connecticut (Phoenix) for the following laboratory analyses:

- TPH) by EPA Method 8015D

Copyright 2026 Kleinfelder

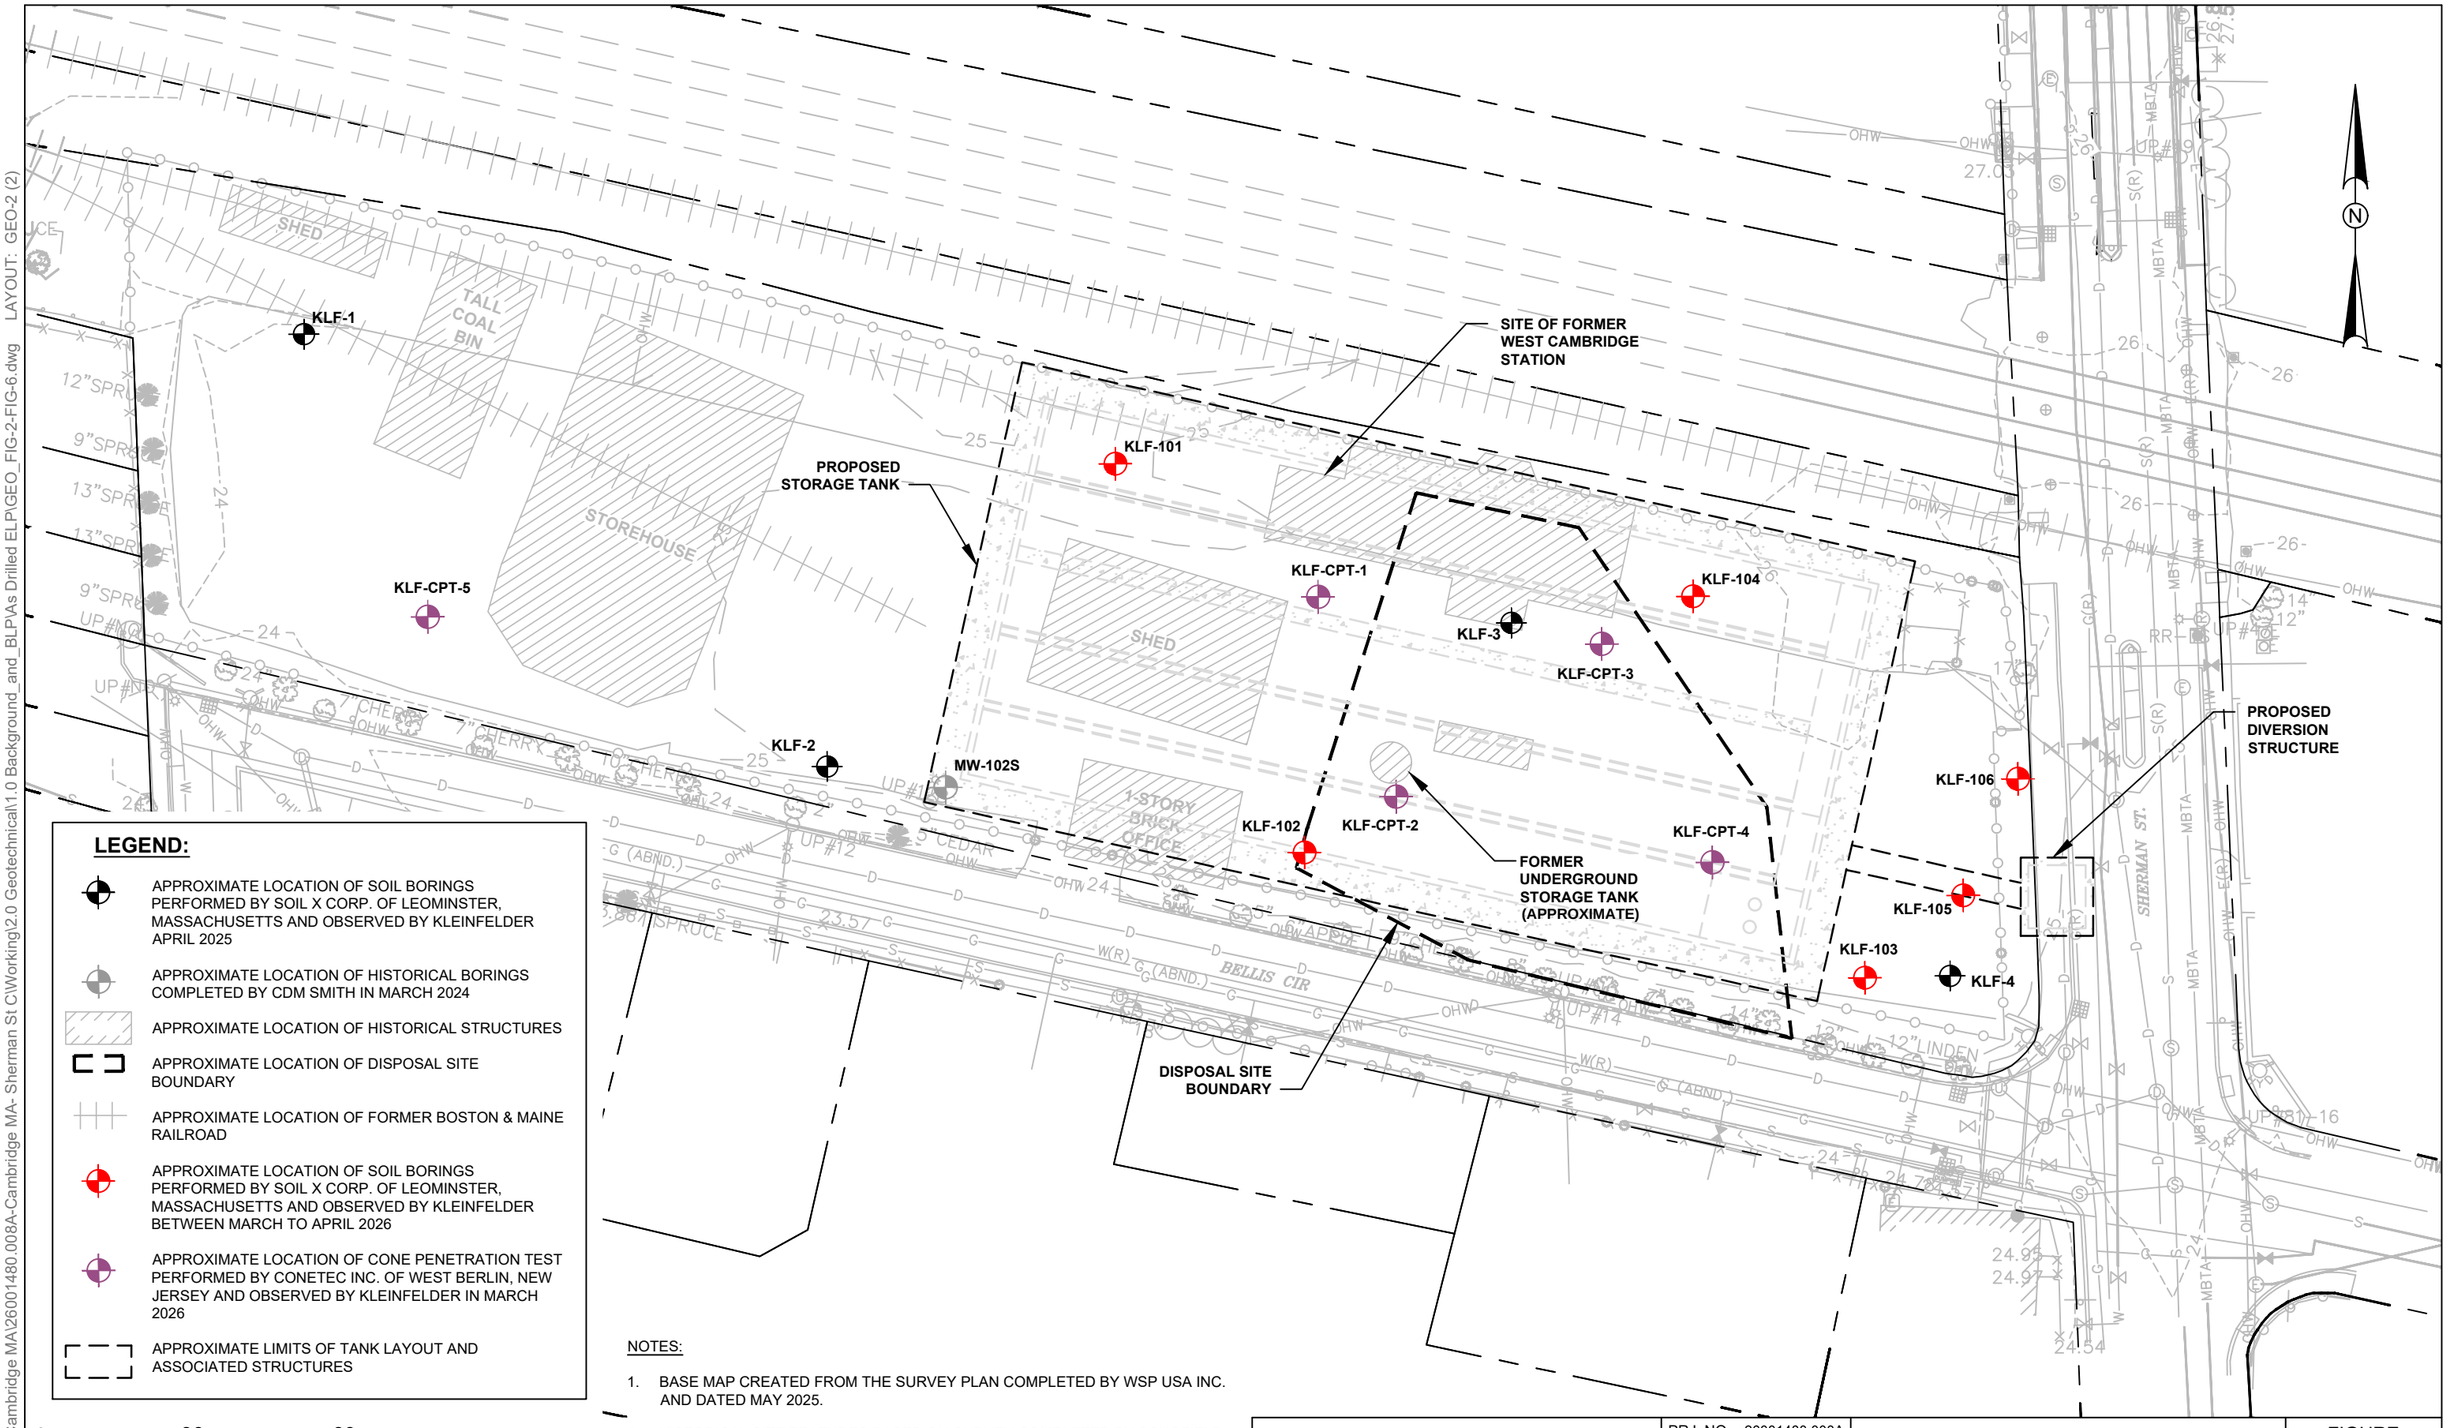
- VOCs by EPA Method 8260B
- SVOCs by EPA Method 8270C
- MCP 14 metals by EPA Methods 6010 and 7471
- PCBs by EPA Method 8082A with Soxhlet extraction
- Reactivity by EPA Methods 9014 and 9030A
- Conductivity by EPA Method 2510B
- Corrosivity/pH by EPA Method 9045C
- Flashpoint by EPA Method 1010A-B

Metals were detected above the laboratory reporting limits in all soil samples; however, concentrations were below MCP RCS-1. Select SVOCs were detected above the laboratory reporting limits in soil samples KLF-102 (8'-12'), KLF-105 (0'-4') and KLF-6 (0'-5'); however, concentrations were below MCP RCS-1 and not required to be reported to MassDEP. Results of soil samples are provided in **Table 2**, and laboratory analytical reports are attached as **Appendix D**.

Discussion and Recommendations

Multiple soil samples were collected throughout the site in native soil and fill material in order provide data that is representative of current site conditions. Based on soil data from this investigation, no compounds were detected above the applicable RCS-1 standards. If environmental conditions encountered at the rest of the Site are consistent with the soils encountered during Kleinfelder's boring program, excess soils are likely suitable for disposal or reuse at either a less than (<) RCS-1 facility or at a Massachusetts unlined or lined landfill, as available. Kleinfelder recommends that if a <RCS-1 facility is selected, that facility should have signed an Administrative Consent Order (ACO) issued by MassDEP. An ACO ensures compliance with MCP regulations by setting forth timetables, Fill Management Plan requirements and sampling schedules, third party inspections and reporting requirements to reduce liability associated with soil reuse and disposal. Soil may also be reused at the point of excavation pending approval of the receiving site by a Licensed Site Professional (LSP) representing the City of Cambridge. All <RCS-1 excavated soil requires approval from the receiving facility prior to transportation and reuse and should be transported under a MassDEP Material Shipping Record (MSR).

Based on the review of available records, a historic petroleum release is documented for the Site under RTN 3-0033725. The petroleum contaminated soil was excavated; however, soil endpoint sample results from the excavation detected petroleum constituents above applicable standards. It is likely that residual contamination associated with this release may be encountered during construction activities. If evidence of soil contamination is noted, the soil should be segregated and not reused. If conditions encountered during excavation in these areas differ from those described in the borings advanced at the Project Area, additional analysis may be required, and disposal recommendations may change. If surplus soils with concentrations equaling or exceeding an RCS-1 threshold are identified during construction, these soils will require management under a Post Closure RAM or Utility-Related Abatement Measure (URAM). Management of soils under a Post Closure RAM or URAM include notification to the MassDEP that contaminated soils are being impacted by construction activities. This notification will provide a plan of how that soil will be managed during construction to prevent exposure to humans and the environment. The plan will outline the methods to minimize fugitive dust, dust monitoring to verify that dust mitigation procedures



Copyright 2026 Kleinfelder

are effective, and soil management procedures to properly secure and prevent access by unauthorized personnel. The plan will also provide the licensed transporter information for soil disposal as well as the location of the selected permitted facility(s) where the soil will be disposed. Semi-annual status reports are required to be submitted to the MassDEP and the City of Cambridge Mayor and Chief Public Health Officer providing an update on construction activities and soil management practices. Upon construction completion, a closure report is required to be submitted to MassDEP that will provide notification that construction is completed and all soil has been appropriately transported to the selected permitted facilities for disposal. Under a Post Closure RAM or URAM, all surplus soils with concentrations equaling or exceeding an RCS-1 threshold must be transported under a Massachusetts Bill of Lading (BOL) signed and stamped by an LSP. Confirmation of contaminant concentrations should be made following excavation due to the variability found in fill soils.

Based on the depth to groundwater observed during this investigation, the need for excavation dewatering is likely. Although groundwater sampling did not detect any analytes above the RCGW-2, groundwater must be characterized prior to discharge. If groundwater is regulated, then it may be discharged in accordance with 310 CMR 40.0045. If this is infeasible, groundwater may be discharged to the stormwater system, under an appropriate National Pollution Discharge Elimination System (NPDES) permit or to the publicly operated treatment works under the appropriate permit. The Contractor will be responsible for obtaining applicable permits, performing required sampling, designing any necessary pretreatment, and ensuring compliance with the permit(s). Alternatively, water may be stored in a fractionation tank or tanker truck and disposed of at a licensed facility. If evidence of groundwater contamination is encountered, work in this area should be performed as a Post Closure RAM or URAM, under direction of the City's LSP.

Notes:
<5 - result is below the method detection limit
(MDL)
Bold - Result detected above MDL but below applicable standard
Bold/Shading - Result was detected above the applicable standard
-- Standard not available or soil not analyzed for that parameter
mg/kg - milligrams per kilogram
ug/kg - micrograms per kilogram
ft - feet
mg/L - milligrams per liter
F - Degrees Farenheit

SUBJECT: PHASE I ENVIRONMENTAL SITE ASSESSMENT
City of Cambridge
41 Bellis Circle
Cambridge, Massachusetts

Dear Ms. Watkins:

Enclosed is the Phase I Environmental Site Assessment (ESA) report for the above-referenced property. We trust the information presented in this report meets your needs at this time.

An executive summary is provided. However, we recommend that the report be read in its entirety for a comprehensive understanding of the items contained therein.

We appreciate the opportunity to provide these services to the City of Cambridge. If you have questions regarding this report or if we can be of further service, please do not hesitate to contact the undersigned.

Sincerely,

KLEINFELDER

Lisa M. Stone

1.0 EXECUTIVE SUMMARY

This report documents a Phase I Environmental Site Assessment (ESA) performed by Kleinfelder, Inc. (Kleinfelder) for the City of Cambridge (Client), of property (Subject Property) located at 41 Bellis Circle Cambridge, MA. The Subject Property location is shown on Figure 1. Kleinfelder understands the Client plans to purchase the Subject Property and has requested this Phase I ESA for due diligence purposes.

This report was prepared using the ASTM International Designation E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the "ASTM Standard"), and the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law).

No Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) associated with the Subject Property were identified. The following Historic Recognized Environmental Condition (HREC) was identified for the Subject Property:

- Release Tracking Number (RTN) 3-33725 was assigned to the Subject Property in 2016 due to the presence of petroleum hydrocarbons in soil. Soil and groundwater assessment was conducted, followed by a remedial excavation conducted under a Release Abatement Measure (RAM) Plan. Following excavation and subsequent post-remedial assessment, a Method 1 Risk Characterization was performed and results determined that a condition of No Significant Risk existed and a Permanent Solution with No Conditions (PSNC) was submitted. RTN 3-33725 represents an HREC.

The following *de minimis* environmental condition was identified:

- The observed staining on the asphalt/concrete pavement at the Subject Property is considered a *de minimis* environmental condition. The staining was localized, and the pavement appeared to be in good condition, with no obvious signs of significant cracks.

The following Business Environmental Risks (BERs) were identified for the Subject Property:

- Polycyclic aromatic hydrocarbons (PAHs) associated with historic fill material were identified during the supplemental Phase II investigation associated with RTN 3-33725 at the Subject Property. Based on the observation of coal and coal ash in soil during drilling activities, these PAHs were not reported to the Massachusetts Department of Environmental Protection (MassDEP) due to the historic fill exemption.

In addition to these conditions, deviations from the Phase I ESA Standard (if any) are discussed in Section 8 of this report. This report is subject to the limitations in Section 2.5.

© 2023 Kleinfelder

2.0 INTRODUCTION

This report is a summary of work performed using the guidelines set forth in the ASTM Standard, the AAI section of the Federal Brownfields Law. This report also generally conforms to the ASTM Standard's suggested table of contents. Minor format modifications have been made to the ASTM Standard's suggested table of contents to assist in better reading and understanding the report findings.

2.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible and consistent with the limitations discussed in this report, RECs and other environmental issues related to the Subject Property.

As defined in the ASTM Standard, a REC is:

> *1) The presence of hazardous substances or petroleum products due to a release to the environment; (2) likely presence of hazardous substances or petroleum products due to a release or likely release to the environment; or (3) presence of hazardous materials or petroleum products under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*
>
> *Note: "Likely" is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinion given therein.*

As defined in the ASTM Standard, a de minimis condition is:

> *A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*

As defined in the ASTM Standard, a CREC is:

> *"… a recognized environmental condition resulting from a past release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use limitations, activity and use limitations, institutional controls, or engineering controls).*

© 2023 Kleinfelder

Additionally, the ASTM Standard defines HRECs, as:

> *…a past release of any hazardous substances or petroleum products that has affected the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to environmental controls.*

The final decision on whether a past release is an HREC rests with the environmental professional (EP) and will be influenced by the current impact (if any) of the past release to the Subject Property.

Finally, the ASTM Standard defines a BER as:

> *…a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations...*

This report describes Kleinfelder's assessment methodology and documents our findings, subject to the limitations presented in Section 2.5 of this report.

The Kleinfelder professionals conducting this Phase I ESA included Jayden Vincente, who conducted the Subject Property reconnaissance, Patrick Monahan and Lisa Stone who are the primary authors of this report; and Eric Henry, who provided technical review of the report and project oversight. The resumes of these Environmental Professionals are included within Appendix A.

2.2 DETAILED SCOPE OF SERVICES

The following sections describe Kleinfelder's work scope:

- Section 2, **Introduction**, includes a discussion of the purpose/reason for performing the Phase I ESA, additional services requested by the Client (e.g., an evaluation of business environmental risk factors associated with the Subject Property), significant assumptions (e.g., property boundaries if not marked in the field), limitations, exceptions, special terms and conditions (e.g., contractual), and user reliance parameters.
- Section 3, **Subject Property Description**, is a compilation of information concerning the Property location, legal description, current and proposed use of the Subject Property, a description of structures and improvements on the Subject Property at the time of Kleinfelder's assessment, and adjoining property use.
- Section 4, **Records Review**, is a compilation of Kleinfelder's review of several databases available from Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the Subject Property; and for off-site

© 2023 Kleinfelder

facilities within the search distances specified in the ASTM Standard. Records provided by the Client are summarized and copies of relevant documents are included in the appendices of this report. Physical setting sources (including topography and soil and groundwater conditions) and typical Client-provided information (e.g., title records, environmental liens, specialized knowledge, valuation reduction for environmental issues, and owner, property manager, and occupant information) are also summarized in this section. Other interviews with people knowledgeable about the Subject Property (including the Client) are included in Section 7.

- Section 5, **Subject Property History**, summarizes the history of the Subject Property and adjoining properties. This Subject Property history is based on various sources, which may include a review of historical aerial photographs, Sanborn Fire Insurance Maps, city or suburban directories, historical topographic maps, building department records, and results of previous Subject Property assessments (if any and reasonably ascertainable).
- Section 6, **Subject Property Reconnaissance**, describes Kleinfelder's observations during the Subject Property reconnaissance. The methodology used and limiting conditions, are described.
- Section 7, **Interviews**, is a summary of telephone and personal interviews performed with "Key Subject Property Managers" that may include the Subject Property owner/manager, occupants/tenants, local government officials, and the Client. Additional interview sources may be contacted if Key Subject Property Managers were not available prior to production of this report and may include adjoining landowners and people with historical knowledge of the area.
- Section 8, **Evaluation**, is a presentation of our findings and opinions regarding the information in Sections 3 through 7, and presents our conclusions regarding the presence of RECs, HRECs, CRECs, and *de minimis* conditions connected with the Subject Property.
- Section 9, **References**, is a summary of some of the resources used to compile this report.

A statement of qualifications and resumes of the signatories of this report are provided in Appendix A and pertinent documentation regarding the Subject Property is included in Appendices B through E.

2.3 ADDITIONAL SERVICES

Kleinfelder's scope of services as part of this Phase I ESA did not include ASTM Standard Practice non-scope evaluations of cultural, historic, wetlands and surface water, threatened, endangered, and other protected species, archaeological resources, and environmental regulatory compliance except where noted. In addition, the Phase I ESA did not include an assessment for lead in drinking water, indoor air quality, industrial hygiene, health and safety, and other ASTM Standard Practice non-scope considerations not described herein.

© 2023 Kleinfelder

2.4 SIGNIFICANT ASSUMPTIONS

Kleinfelder does not guarantee the accuracy of the information supplied by its sources but reserves the right to rely on this information in formulating a professional opinion on the potential for contamination at the Subject Property. Kleinfelder also assumes the Client provided all applicable and available environmental records and specialized knowledge regarding the Subject Property. Kleinfelder has not made other significant assumptions during the performance of this Phase I ESA.

If specific information was not available, Kleinfelder also made assumptions for this Phase I ESA regarding the surficial groundwater flow direction at the Subject Property based on observed conditions and a review of United States Geological Survey (USGS) Topographic Maps. Kleinfelder assumed that historical aerial photographs, topographic maps, and other information was representative of conditions during periods between coverage.

2.5 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and may not identify all environmental problems and will not eliminate all risk. This report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of its clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help the Client understand and better manage risks. Since such detailed services involve greater expense, Kleinfelder asks its clients to participate in identifying the level of service that will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

Kleinfelder performed this Phase I ESA consistent with the guidelines set forth in the ASTM Standard Practice; and the proposed scope of services subsequently approved by City of Cambridge. No other warranty, either express or implied, is made. Environmental issues not specifically addressed in this report were beyond the scope of Kleinfelder's services and not included in the evaluation.

This report may be used only by City of Cambridge, and only for the purposes stated within a reasonable time from its issuance, but in no event later than one year from the date of the report. Land or facility use, conditions on and off the Subject Property, regulations, or other factors may change over time, and additional work may be required with the passage of time. Since activities at the Subject Property and regulations beyond Kleinfelder's control may change at any time after

© 2023 Kleinfelder

the completion of this report, the observations, findings, and opinions provided herein are considered valid only as of the date of the Subject Property visit. Pursuant to Section 4.6 of the ASTM Standard, this report should not be relied upon after 180 days from the date of its oldest component, which is July 10, 2023 (expires January 10, 2024). Any party other than the Client who wishes to use this report shall notify Kleinfelder of such intended use. Based on the intended use of the report, Kleinfelder may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by the Client or anyone else will release Kleinfelder from any liability resulting from the use of this report by any unauthorized party, but only to the extent of any such non-compliance by the Client.

2.6 SPECIAL TERMS AND CONDITIONS

No special terms and conditions were agreed to by the Client and Kleinfelder.

© 2023 Kleinfelder

3.0 SUBJECT PROPERTY DESCRIPTION

The Subject Property description is presented in this section and addresses the condition of the Subject Property at the time of the Phase I ESA. The Subject Property location is shown on Figure 1. Tables 3-1 through 3-4 summarize the physical characteristics of the Subject Property and adjoining properties.

3.1 LOCATION AND LEGAL DESCRIPTION

The information presented in Table 3-1 denotes the physical location and legal description of the Subject Property. This information was obtained from review of various maps (such as topographic maps and tax assessor maps), aerial photographs, public records at Municipality and/or County offices, interviews, and/or information provided by the Client.

TABLE 3-1
Location and Legal Description

PARAMETER	INFORMATION/COMMENTS
LOCATION	The Subject Property is located at 41 Bellis Circle, Cambridge, MA 02140 (Figure 1).
LEGAL DESCRIPTION	A legal description for the Subject Property listed: • Parking Lot
ASSESSOR'S PARCEL NUMBER(S)	The Subject Property is identified as Property ID 271-44.
ACREAGE	The Subject Property is approximately 0.93 acres.
ADDRESS(ES)	An address of 41 Bellis Circle is associated with the Subject Property.
PROPERTY OWNER(S)	The Subject Property is owned by Cambridge Montessori School Inc.
SECTION, TOWNSHIP, AND RANGE	Massachusetts is not affiliated with the Public Land Survey System.
ZONING	Based on zoning information available on the City of Cambridge website dated 2004, the parcel is zoned as a C1A, Residence, multifamily, apartments, dorms.

© 2023 Kleinfelder

3.2 CURRENT / PROPOSED USE OF THE PROPERTY

Current and proposed Subject Property uses are described in Table 3-2.

TABLE 3-2
Current and Proposed Uses

PARAMETER	GENERAL OBSERVATIONS
CURRENT USE	The Subject Property is a parking lot.
PROPOSED USE	The proposed use of the Subject Property is understood to remain the same.

3.3 DESCRIPTION OF STRUCTURES / IMPROVEMENTS

Structures and/or improvements observed on the Subject Property at the time of Kleinfelder's reconnaissance, July 26, 2023, are described in Table 3-3.

TABLE 3-3
Structures and Improvements

PARAMETER	GENERAL OBSERVATIONS
STRUCTURES	The Subject Property is developed as a parking lot with no existing structures.
IMPROVEMENTS	No improvements were noted on the Subject Property.

3.4 CURRENT USES OF ADJOINING PROPERTIES

Kleinfelder performed a brief drive-by survey of the properties immediately adjoining to the Subject Property on July 26, 2023. A summary of the observations from the drive-by and a review of recent aerial photographs regarding the surrounding properties is presented in Table 3-4 and shown on Figure 2.

© 2023 Kleinfelder

TABLE 3-4
Adjoining Properties

DIRECTION	LAND USE DESCRIPTION
NORTH	Railroad tracks and NOCA Glass School
EAST	Residential properties
SOUTH	Residential Properties and Cambridge Montessori School
WEST	Residential Properties

Adjoining property land use at the time of Kleinfelder's assessment appeared to be primarily residential properties. No environmental conditions were visually apparent on the adjoining properties at the time of Kleinfelder's reconnaissance, as viewed from the Subject Property and public rights-of-way.

© 2023 Kleinfelder

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review is to obtain and review records that would help to evaluate RECs in connection with the Subject Property and bordering properties. Federal, State, and local regulatory agencies publish databases or "lists" of businesses and properties that handle hazardous materials or hazardous waste or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. Kleinfelder contracted a commercial database service, EDR, of Shelton, Connecticut, to perform the government database search for listings within the appropriate ASTM Standard Practice minimum search distance of the Subject Property. Included in the EDR Radius Map™ Report with GeoCheck® (EDR, 2023a) is a listing of specific databases outlined by the ASTM Standard Practice. A listing of the search distances, databases evaluated, dates the databases were last updated, and types of information contained in each database are included in the regulatory database search report provided in Appendix B of this report.

EDR utilizes a geographical information system to plot the locations of reported spills, leaks, incidents, etc., Kleinfelder reviews this information to help establish if the Subject Property or nearby properties are listed in the databases and lists. Each of the listings was reviewed by Kleinfelder to assess whether the corresponding property details included in EDR's report revealed a potential environmental impact to the Subject Property. Many listings in the report were concluded not to have the potential to impact the Subject Property based on the following, or a combination thereof:

- The listed property was located at a distance where the facility would be unlikely to impact the Subject Property based on Kleinfelder's evaluation of the relevant data in the EDR report and knowledge of the Subject Property vicinity.
- The listed property was located in a down-gradient or cross-gradient direction from the Subject Property, based on the anticipated direction of groundwater flow at the property being evaluated, and is located at a distance that would be unlikely to impact the Subject Property. Note that groundwater flow direction may be variable in the vicinity of the Subject Property and determinations as to down- or cross-gradient direction were made only when groundwater flow direction was available for a specific property.
- The listed property was identified in the UST or Small Quantity Generator (SQG) databases and was not on or immediately adjoining the Subject Property. The property was not listed in other databases that reported a release of a hazardous substance or petroleum product and/or was not listed as having environmental violations. The listing of a facility on these databases alone is not indicative of an unauthorized release.

© 2023 Kleinfelder

- The listing for the facility suggested a short-term release had occurred (i.e., from incidental traffic accidents, or chemicals from illegal drug labs found at residences) with associated response actions completed.
- The quantity of the hazardous substances or petroleum product released from an off-site facility was not considered to have resulted in contamination above the most stringent criteria that would require regulatory action. Therefore, no impact to the Subject Property is anticipated.
- The listed property record indicates that the property was characterized, the reported release affected soil only, the listed property was not on or adjacent to the Subject Property, and the release was not recognized as indicative of area-wide conditions or was characterized as a soil removal action only.
- The listed property record indicates that contamination on the property is limited to relatively non-mobile contaminants, including PAHs and metals, in soil only, on a non-adjacent property.
- The listed property record indicates that the case has been closed to the satisfaction of the designated lead regulatory agency and residual contamination, if present, is not considered likely to affect the Subject Property based on one or more of the criteria mentioned in the bulleted items above (referred in the ASTM Standard as an HREC).

Based on these criteria indicating no material threat of a release that affected the Subject Property and/or no release that could require future regulatory agency oversight, the listings concluded not to have the potential to impact the Subject Property were not evaluated further and are not discussed in the following sections.

4.2 RESULTS OF DATABASE SEARCH

The remaining property listings, if applicable, were reviewed to assess whether these properties had environmental releases that may have resulted in RECs in connection with the Subject Property. Listed properties for which a reported release may have resulted in a REC in connection with the Subject Property were further assessed by performing a review of agency files available through the state and local agencies to evaluate whether the listed release represents a potential impact to the Subject Property.

© 2023 Kleinfelder

4.2.1 Subject Property Listings

The Subject Property was listed in multiple databases in *The EDR Radius Map™ Report with GeoCheck®* (EDR, 7385010.2s), as follows:

41 Bellis Circle – This address was listed in multiple databases searched by EDR, including the MA State Hazardous Waste Site (SHWS), MA Release, and MA Asbestos databases. According to the MA Release database, one release was reported for the Subject Property and has since been closed by MassDEP and is summarized below:

- A 120-day notification was reported to MassDEP on August 1, 2016 for a release of oil found in soil during a Phase II Environmental Site Assessment (ESA) report and RTN 3-0033725 was assigned. Concentrations of Extractable Petroleum Hydrocarbons (EPH) and Volatile Petroleum Hydrocarbons (VPH) exceeded Massachusetts Contingency Plan (MCP) Reportable Concentration (RC) for Category S-1 soils (RCS-1) in soil samples collected from a depth of five to 10 feet below ground surface in a soil boring advanced during the investigation. Concentrations of VPH, EPH and volatile organic compounds (VOCs) were also detected in groundwater; however, these concentrations were below the applicable MCP RCGW-2 that applies to the Subject Property. The Phase II also included a ground penetrating radar (GPR) survey and no anomalies indicating the presence of an underground storage tank(s) (USTs) were observed.

  A supplemental Phase II was subsequently conducted to evaluate extent of impacts to soil and further evaluate groundwater at the Subject Property. Results of soil samples collected from additional borings concluded that the release was likely attributed to a fuel oil tank as the Diamond Coal Company that formerly occupied the Subject Property also sold heating oil and that USTs were removed in the early 1980s.

  PAHs commonly found in historic fill material were also identified above MCP RCS-1 during the supplemental Phase II investigation. Field observations noted the presence of coal and coal ash in soil at the Subject Property thus release notification was not required per 310 CMR 40.0317(9). The supplemental Phase II investigation did not detect any groundwater impacts.

  In August 2016, an approximately 60 foot by 60 foot area of petroleum contaminated soil was excavated from the parking lot under a RAM Plan. The average depth of the excavation was approximately 13 to 15 feet below the ground surface (bgs). Some areas extended to a depth of approximately 18 feet bgs. A total of 21 endpoint soil samples were collected from the sidewalls and base of the excavation and submitted for laboratory analysis of EPH and VPH. Results indicated residual concentrations of VPH and EPH above applicable Method 1 S-1 soil standards in localized areas in the southern, western and northern sidewalls; however, it was determined that the benefit of additional excavation in these areas to reduce concentrations was not feasible. Samples collected from the northern sidewall and base of the excavation did not detect VPH or EPH above laboratory reporting limits and/or applicable Method 1 S-1 soil standards. A total of 2,892.76 tons of contaminated soil were excavated and transported for off-site recycling.

© 2023 Kleinfelder

Following soil excavation, additional soil borings and groundwater monitoring wells were installed to delineate soil endpoint sample results and assess groundwater in areas of residual contamination as well as the potential for off-site migration. Soil sample results detected VPH and EPH constituents above laboratory reporting limits, but below applicable standards. No groundwater concentrations detected exceeded the applicable Method 1 GW-2 or GW-3 standards.

Following post-excavation soil and groundwater sampling a Method 1 Risk Characterization was performed. Results of the Method 1 Risk Characterization determined that a condition of No Significant Risk existed and a PSNC was submitted in October 2016.

- The Subject Property was also listed in the MA ASBESTOS database for asbestos in a vacant building located on the Subject Property. According to EDR, approximately 90 square feet of asbestos containing material was removed from the former building on June 20, 2014.

4.2.2 Off-Subject Property Listings

Multiple facilities in the Subject Property vicinity are listed in various databases searched by EDR (EDR, 7385010.2s). The following listings were further reviewed as to the potential to impact the Subject Property as summarized below.

- **147 Sherman Street, Cambridge (111 feet northeast)(EDR Map ID A2-A4)** - This facility was listed in the MA SHWS, MA Inst Control, MA Brownfields, MA Release and MA Asbestos databases. There are two RTN's associated with this facility. The first is RTN 3-0014286 for a 120 day notification on October 1, 1996 for the release of a chlorinated solvents related to electronics manufacturing. Following injections to reduce VOCs in groundwater in two localized areas outside to the south side of the eastern portion of the building, a Class A-2 Response Action Outcome Statement (RAO) was submitted to MassDEP. The MassDEP audited the RAO in 2007 following policy changes and multiple rounds of indoor air sampling was conducted to evaluate conditions. A sub slab depressurization system (SSDS) was installed to mitigate vapor intrusion conditions. In January 2014 a Class C-1 RAO was submitted. An Activity and Use Limitation (AUL) was placed on the property specifying the continued operation of the SSDS. A PSNC was submitted in July 2017. PSNC was submitted in July 2017.

  RTN 3-0033114 was assigned for a two hour notification on August 27, 2015 for the release of approximately 17 gallons of hydraulic fluid from a concrete pumping truck onto asphalt. The oil was subsequently cleaned up and subsurface gravel in areas of large pavement cracks were assessed and determined to be impacted, but localized. The impacted gravel was excavated. No soil or groundwater impacts were identified. A PSNC was submitted in November 2015.

  Although this property is adjacent, it is separated by railroad tracks from the Subject Property. Further, localized groundwater contamination was not determined to be

© 2023 Kleinfelder

migrating off-site towards the Subject Property. Based on this information and the current status this property is not considered to be a REC to the Subject Property.

- **North Cambridge Garage (auto repair facility), 140 Sherman Street (139 feet east-northeast)(EDR Map ID B5-B6)** - This facility was listed in the Resource Conservation Recovery Act – Very Small Quantity Generator (RCRA-VSQG), Facility Index System (FINDS), Enforcement and Compliance History Online (ECHO), and MA HW Gen databases. According to the EDR, no violations have been found at this facility and therefore is not considered to be a REC to the Subject Property.

- **Parcel 62, 85 Bolton Street (618 feet east-southeast)(EDR Map ID C7-C20)** - This facility was listed in the MA Release database under RTN 3-0000275 assigned on January 1, 1987 as a Location to Be Investigated (LTBI). An assessment conducted on the property identified low level impacts to soil and groundwater; however, upon review of the assessment report, the MassDEP issued No Further Action. Due to the distance and hydrogeologically cross-gradient direction, this facility is not considered to be a REC to the Subject Property.

4.2.3 Orphan List

Facilities not plotted by EDR due to poor or inadequate address information are referred to as orphan sites. Fifty-eight (58) unmapped orphan sites were listed in the EDR report. The orphan summary/unmapped site report was reviewed to assess the potential for the listed facility to pose a REC to the Site. Based on the review, the facilities listed are not considered RECs.

4.3 OTHER RECORDS REVIEWED / AGENCIES CONTACTED

The following additional sources of environmental records were reviewed during this Phase I ESA for the purposes of meeting the ASTM Standard Practice. Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable documentation regarding RECs present at the Subject Property and adjoining facilities via a public records request. Summaries of interviews with local regulatory agency representatives, when performed, are included in Section 7 of this report. Information was obtained or reviewed from the following agencies:

- City of Cambridge Assessor's Office
- City of Cambridge Fire Department
- City of Cambridge Inspectional Services Department
- City of Cambridge City Clerk's Office
- City of Cambridge Historical Commission
- Massachusetts Geographic Information System
- MassDEP UST Query Tool

© 2023 Kleinfelder

4.3.1 City of Cambridge Assessor's Office

On July 10, 2023, Kleinfelder submitted a public records request via email to the City of Cambridge for assessor's records related to the Subject Property. As a result, a 2023 Assessor's card was provided. The card indicates that the current owner for the Subject Property is Cambridge Montessori School Inc., who has owned the Subject Property since 2017. The property was previously owned by Bellis Circle, Inc. from 1995 to 2017. The card states the Subject Property is currently used as parking for the adjacent Montessori School. According to the assessor information, the parking lot is approximately 40,000 square feet in area.

A copy of the Assessors Card is provided in Appendix C.

4.3.2 City of Cambridge Fire Department

On July 10, 2023, Kleinfelder submitted a public records request via email to the City of Cambridge for Cambridge Fire Department records for the Subject Property relative to the presence of USTs, above-ground storage tanks (ASTs) and oil and/or hazardous materials storage. Results of the record search provided a permit for the removal of a 275 gallon No. 2 fuel oil AST in July 2015. No further information on the removal of the AST was provided.

A copy of the permit is provided in Appendix C.

4.3.3 City of Cambridge Inspectional Services Department

On July 10, 2023, Kleinfelder submitted a public records request via email to the City of Cambridge for Inspectional Services Department records related to the Subject Property. The Inspectional Services Department provided a permit for demolition of a single story red brick building with wood framing approximately 15 feet by 30 feet in June 2014.

Also on file with the Inspectional Services Department is an asbestos inspection report dated March 25, 2014 that identified chrysotile asbestos in boiler insulation, transite panels and floor tiles (9 inch by 9 inch) within the building. A MassDEP Asbestos Notification Form ANF-001 was provided as well as an Asbestos Permit Application dated July 2014 for the removal of the boiler insulation, transite panels and floor tile.

Copies of the permits are provided in Appendix C.

© 2023 Kleinfelder

4.3.4 City of Cambridge City Clerk's Office

On July 10, 2023, Kleinfelder submitted a public records request via email to the City of Cambridge for City Clerk records related to the Subject Property. The City Clerk's office had no available records on file for the Subject Property.

4.3.5 City of Cambridge Historical Commission

On July 10, 2023, Kleinfelder submitted a public records request via email to the City of Cambridge for Historical Commission records related to the Subject Property. The Cambridge Historical Commission had no available records on file for the Subject Property.

4.3.6 Massachusetts Geographic Information System

According to the information available through the online map viewer function of MassGIS (Figure 3), the Subject Property is not located in a Zone II, Interim Wellhead Protection Area (IWPA), Zone A Public Water Supply (PWS) Protection area, medium or high yield non-potential drinking water source area, sole source aquifer, or surface water protection area. Based on this information the Massachusetts Contingency Plan (MCP) Method 1 GW-2 and GW-3 standards would apply to the Subject Property.

There is a small unnamed surface water body in the northeastern portion of Danehy Park, approximately 190 feet southwest of the Subject Property. Fresh Pond is the closest named surface water body, located approximately 0.54 miles southwest of the Subject Property. Fresh Pond is a surface water source of drinking water for the City of Cambridge.

A Protected Open Space, Danehy Park, is located approximately 130 feet to the west of the Subject Property at its closest point. This area is also shown as a solid waste landfill; however, topographic maps depict this area as a clay pit. Another Protected Open Space is located approximately 200 feet to the north of the Subject Property. Topographic maps depict this area as a cemetery.

4.3.7 MassDEP UST Query Tool

According to the MassDEP's online UST query tool, reviewed on July 11, 2023 there are no USTs listed for the Subject Property.

© 2023 Kleinfelder

4.4 PHYSICAL SETTING SOURCE(S)

Table 4-1 presents information concerning the physical setting of the Subject Property. The information was obtained from published maps and other sources.

TABLE 4-1
Physical Setting

DATA	GENERAL INFORMATION
USGS TOPOGRAPHIC QUADRANGLE	The Subject Property is located in the USGS 7.5-Minute Series (Topographic) Quadrangle for Lexington, Massachusetts, 2018. Based on the Physical Setting Source Summary provided by EDR and included in Appendix B (EDR, 2023a), the Subject Property elevation is approximately 13 feet above sea level. The Subject Property is generally flat. Topography of the regional area slopes to the southwest.
SOIL TYPE	According to the EDR Radius Map™ Report with GeoCheck®, the Subject Property soil type consists of Urban Land.
OIL AND GAS WELLS	Based upon Kleinfelder's review of the EDR Radius Map™ Report with GeoCheck®, no oil or gas wells are located on the Subject Property or within the vicinity (EDR, 2023a).
RADON	Based on available information obtained from the US EPA radon information website massachusetts.pdf (epa.gov), the Subject Property is located in the mapped US EPA radon zone 1, an area with average indoor radon levels greater than 4 picocuries per liter (pCi/L).

Table 4-2 presents information concerning regional geology and hydrogeology. The information was obtained from published maps and other sources.

© 2023 Kleinfelder

TABLE 4-2
Regional Geology and Hydrogeology

PHYSICAL PARAMETER	INFORMATION/COMMENTS
REGIONAL PHYSIOGRAPHY AND GEOLOGY	According to the EDR Radius Map™ the Subject Property is on Paleozoic and Cambrian rock formations, specifically Eugeosynclinal Deposits.
REGIONAL HYDROGEOLOGY	According to the EDR Radius Map™ Report with GeoCheck® regional groundwater flow is to the north/ northwest.
SURFACE WATER / WETLANDS	No National Wetland Inventory (NWI) wetlands were mapped by EDR on the Subject Property.
DEPTH TO GROUNDWATER AND DIRECTION OF ANTICIPATED FLOW[1]	According to the EDR Radius Map™ Report with GeoCheck® regional groundwater flow is to the north/ northwest. According to the PSNC report from 2016, groundwater flow direction at the Subject Property is towards the southwest and groundwater depth ranges from approximately eight to 11 feet below ground surface.
REGIONAL GROUNDWATER QUALITY PROBLEMS	No regional groundwater quality problems were identified.
WATER SUPPLY	The Subject Property is a parking lot and currently not connected to the municipal water supply; however, the properties in the vicinity are connected to the municipal water supply.
FLOOD ZONE DESIGNATION	According to the EDR Radius Map™ Report with GeoCheck®, FEMA Flood Zone 25017C0419E, the Subject Property is not on a Flood Hazard Area.

[1] Groundwater flow direction is based on regional information sources. Site-specific conditions may vary due to a variety of factors including geologic anomalies, utilities, nearby pumping wells (if present), and others.

4.5 USER PROVIDED INFORMATION

Kleinfelder understands the Client is refinancing the Subject Property with no proposed changes in use. Information regarding the current owners/occupants of the Subject Property is summarized in Table 4-3.

© 2023 Kleinfelder

TABLE 4-3
Owner and Occupant Information

ENTITY	NAME
OWNER	The Subject Property is owned by Cambridge Montessori School Inc.
OCCUPANT(S)	The Subject Property is occupied by a parking lot.

Summaries of interviews of key individuals with knowledge of the Subject Property ("Key Subject Property Managers") are provided in Section 7. The following sections present information provided to Kleinfelder by the Client.

4.6 TITLE RECORDS

A Chain-of-Title search for the Subject Property was not provided to Kleinfelder. Therefore, a review of a Chain-of-Title report was not performed as part of this Phase I ESA.

4.7 ENVIRONMENTAL LIENS AND USAGE LIMITATIONS

According to information provided in EDR's regulatory agency database search report (EDR, 2023a), there are no liens pertaining to the Subject Property listed in the Federal Superfund Liens List maintained by the USEPA. A search of state environmental liens and activity and use limitations was not performed as part of this Phase I ESA.

4.8 VALUE REDUCTION

As part of the ASTM Standard process, information is to be gathered regarding the prospective purchase price of the Subject Property relative to its fair market value. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference may be attributed to environmental degradation of the property. According to the Phase I User Questionnaire prepared by Ms. Katherine Watkins of the City of Cambridge, Section 7.1 and included in Appendix C, the appraisal considered fair market value.

© 2023 Kleinfelder

4.9 OTHER INFORMATION / DOCUMENTS PROVIDED

Information and documents provided by the Client are summarized below and provided in Appendix C.

- A plan from Hopkins Atlas from 1873 depicting the Subject Property on Bolton Street with two structures, one at each end. The Subject Property is labeled “Mrs. Sullivan”.
- August 28, 1878 Plan from Cambridge Engineering depicting the Fitchburg Railroad to the north of the Subject Property.
- A plan from Bromley Atlas dated 1894 depicting the Subject Property on Bolton Street with one structure in the middle. The Subject Property is labeled “West Cambridge Station”.
- Plan 5032 dated 1901 showing the Subject Property encompassing the entire length of Bolton Street. The structure from the 1894 map is present.
- A plan from Bromley Atlas dated 1930 depicting the same structure as the 1901 and 1894 atlas, labeled “West Cambridge Station” and “Boston & Maine R.R.”.
- Plan 1155 of 1961, Book 9867, Page 266 depicting Bolton Street as John F. Bellis Circle, showing portions of three buildings located on the Subject Property.

© 2023 Kleinfelder

5.0 SUBJECT PROPERTY HISTORY

The history of the Subject Property was researched to identify obvious uses. Historical land use was researched to the first developed use, or back to 1940, whichever was earlier or readily available. Table 5-1 summarizes the availability of information reviewed during this assessment.

TABLE 5-1
Historical Information Sources

SOURCE	YEARS REVIEWED	SOURCE / AVAILABILITY

PREVIOUS ASSESSMENT(S)	None Provided	Not Applicable

5.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan areas and small, established towns. Kleinfelder requested EDR to search its library of Sanborn Fire Insurance Maps for maps of the Site. EDR responded that Sanborn Fire Insurance Maps were available for the Subject Property for the years 1900 through 2006. A summary of the information obtained from the Sanborn Fire Insurance Maps review is provided in Table 5-2. Available Sanborn Maps are provided in Appendix D.

© 2023 Kleinfelder

TABLE 5-2

Sanborn Fire Insurance Maps Reviewed

YEAR(S)	SUMMARY
1900	**Subject Property:** The Subject Property is on Bolton Street and has a structure labelled "W Cambridge Depot" in the eastern portion with two railroad spurs in the western portion. **Surrounding Area:** The surrounding areas appear to be residential properties to the south and east. A railroad tracks labelled "Fitchburg R R" are located directly north. Residential properties are located to the north of the railroad tracks.
1935	**Subject Property:** The building present in the 1900 map is no longer present. The Subject Property is labelled "Diamond Coal Co" and has three structures labelled "Coal shed, Open Coal Bin and Office". Railroad spurs remain on the Subject Property. **Surrounding Area:** The surrounding areas appear to be mostly residential properties to the south and east. Railroad tracks labelled "B&M R R (Fitchburg Division)" are located directly north with residential properties further north of the railroad tracks.
1950	**Subject Property:** The Subject Property is occupied by Diamond Coal Co with three additional structures present, one to the west of the coal shed and one in the eastern portion. It is difficult to determine the writing on the structure adjacent to the coal shed, but one of the two new structures in the eastern portion is labeled "Pump Shed." There is also a fuel oil tank present north of the office. Railroad spurs remain on the Subject Property. Bolton Street is now John F. Bellis Circle. **Surrounding Area:** The surrounding areas appear to be mostly residential properties to the south and east. Railroad tracks labelled "B&M RR (Fitchburg Division)" are located directly north with residential properties further north of the railroad tracks.
1986	**Subject Property:** The Subject Property is depicted as vacant land with railroad spurs still present. **Surrounding Area:** The surrounding area is now mixed residential and commercial to the south and east. The railroad tracks to the north are now labelled "MBTA" an electronics lab is located beyond the railroad tracks to the north.
1990 1992	**Subject Property:** The Subject Property is depicted as vacant land. Previous railroad spurs are no longer present.

© 2023 Kleinfelder

YEAR(S)	SUMMARY
1995 2003 2004 2005 2006	**Surrounding Area:** The surrounding area appears the same as the 1986 Sanborn Map.

5.2 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means or observed during a reconnaissance visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR (EDR 7385010.8) and span a period of 80 years. A tabulation of the aerial photographs reviewed by Kleinfelder is presented in Table 5-2. Copies of the aerial photographs provided by EDR and are included in Appendix D.

© 2023 Kleinfelder

TABLE 5-3
Historical Aerial Photographs Reviewed

YEAR	APPROXIMATE SCALE	SUMMARY
1938	1" = 500'	**Subject Property:** The Subject Property appears to have multiple structures on it. There is one large structure that appears to be the coal shed seen on the Sanborn Map along with a smaller structure to the west of the coal shed. Due to the quality of the photograph, the remaining structures are difficult to determine. **Surrounding Area:** The surrounding area appears to be residential properties to the north, east, and south. There are railroad tracks directly north of the Subject Property. Vacant land is located beyond the railroad tracks to the northwest. The land southwest of the Subject Property appears to have been cleared.
1952 1955 1969	1" = 500' 1" = 500' 1" = 500'	**Subject Property:** The Subject Property appears to have additional structures on it, with the coal shed present as well as the office and open coal bin, pump shed and small structure to the north of the pump shed are visible. **Surrounding Area:** The surrounding area appears to be residential properties to the north, east, and south. There are railroad tracks directly north of the Subject Property. A building is located beyond the railroad tracks to the north, which has an addition on the western side in 1969. There is a large complex of buildings present to northwest. It appears as the land southwest of the Subject Property is undeveloped.
1970 1978	1" = 500' 1" = 500'	**Subject Property:** The are fewer buildings present on the Subject Property. It appears that only the office remains. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties.
1980	1" = 500'	**Subject Property:** The Subject Property appears to be vacant of structures. Vegetation is present in the western, central and northern portions. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties.
1987 1995	1" = 500' 1" = 500'	**Subject Property:** The Subject Property appears to be used as a paved parking lot. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties.

© 2023 Kleinfelder

TABLE 5-3 (Continued)
Historical Aerial Photographs Reviewed

YEAR	APPROXIMATE SCALE	SUMMARY
2006	1" = 500'	**Subject Property:** The Subject Property appears the same as it does today, as a parking lot. There is vegetation along the western and southern borders with a small area of vegetation in the northeast corner. Grass appears to be present along the northern border. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties. Danehy Park is present to the southwest of the Subject Property.
2010	1" = 500'	**Subject Property:** The Subject Property appears the same as it does in the 2006 photograph; however, there is new pavement on the western half. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties.
2014 2018	1" = 500' 1" = 500'	**Subject Property:** The Subject Property appears the same as it does in the 2010 photograph; however, the asphalt paving is uniform across the entire area. **Surrounding Area:** The surrounding area appears the same as previous photographs but is continuing to be more developed with residential and commercial properties.

Note: Aerial photographs only provide information concerning indications of land use, and no conclusions regarding the release of hazardous substances or petroleum products can be drawn from the review of photographs alone.

5.3 CITY DIRECTORIES

City directories provide information regarding property occupants by address. EDR provided a city directory image report (EDR, 7385010.5), which included a review of city directories for the Subject Property (41 Bellis Circle) and nearby properties along Bellis Circle (formerly Bolton Street) between 1896 and 2017. A summary of the city directory listings for the Subject Property and adjoining properties is provided below and copies of the city directories are included in Appendix D.

- *41 Bellis Circle (Formerly 41 Bolton St)*; Property not listed in EDR City Directories.

Adjacent property city directory listings are residential to the east and south).

© 2023 Kleinfelder

No indications of RECs in connection with the Subject Property or adjacent properties were identified based on a review of city directories provided by EDR.

5.4 HISTORICAL TOPOGRAPHIC MAP REVIEW

Kleinfelder obtained information regarding historical topographic maps of the vicinity of the Subject Property from EDR (EDR, 7385010.4). The topographic maps reviewed for this assessment are listed in Table 5-3 and copies of the maps are included in Appendix D.

TABLE 5-4
Historical Topographic Maps Reviewed

YEAR	SCALE	SUMMARY
1893	1:62,500	**Subject Property:** No structures are depicted on the Subject Property. **Surrounding Area:** Bellis Circle is present. The surrounding area has some modern-day infrastructure. The railroad to the north of the Subject Property exists. Sherman street to the east of the Subject Property exists.
1903	1:62,500	**Subject Property:** The Subject Property appears to have a terminated rail line on it as depicted on the Sanborn Map. **Surrounding Area:** The surrounding area is slightly more developed than the previous map. The railroad to the north is now labelled as “Fitchburg Division”.
1943, 1944 1946, 1947	1:24,000 1:25,000	**Subject Property:** The Subject Property is depicted in a highly developed area. No structures are depicted on the Subject Property. **Surrounding Area:** The railroad to the north is now labeled as “B and M” and a cemetery located north of the railroad. A clay pit is present to the west and southwest of the Subject Property. The remaining area appears the same as previous maps.
1949	1:31,680	Subject Property and surrounding area not mapped.
1956	1:24,000	**Subject Property:** The Subject Property appears to have two structures depicted. **Surrounding Area:** The surrounding area appears the same as the previous map.
1970, 1971	1:24,000	**Subject Property:** The Subject Property is depicted in a highly developed area. No structures are depicted on the Subject Property. **Surrounding Area:** The surrounding area appears the same as the previous map, except that the clay pit to the west and southwest is no longer present, the area appears vacant. There is also a building present to the north of the railroad tracks.

© 2023 Kleinfelder

YEAR	SCALE	SUMMARY
1977 (provided map is an aerial photograph)	1:25,000	**Subject Property:** No structures are depicted on the Subject Property. **Surrounding Area:** The surrounding area appears the same as the previous map.
1979	1:25,000	Subject Property and surrounding area not mapped.
1985, 1987	1:25,000	**Subject Property:** The Subject Property is depicted in a highly developed area. No structures are depicted on the Subject Property. **Surrounding Area:** The surrounding area appears the same as the previous map.
2012 2015 2018	1:24,000 1:24,000 1:24,000	**Subject Property:** The Subject Property is depicted in a highly developed area. No structures are depicted on the Subject Property. **Surrounding Area:** The surrounding area appears the same as the previous map. Danehy Park is labeled to the southwest of the Subject Property.

6.0 SUBJECT PROPERTY RECONNAISSANCE

Kleinfelder's Phase I ESA activities included a Subject Property reconnaissance. This section summarizes the findings from the Subject Property reconnaissance.

6.1 METHODOLOGY AND LIMITING CONDITIONS

Jayden Vincente of Kleinfelder performed a reconnaissance of the Subject Property and vicinity on July 26, 2023. The Subject Property reconnaissance included a visual inspection of the Subject Property to assist in identifying the presence or likely presence of hazardous substances or petroleum hydrocarbons under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Subject Property (i.e., RECs). Observations of readily apparent environmental conditions are summarized in Table 6-1, and color photographs of the Subject Property are presented in Appendix E. The approximate Subject Property boundaries are shown on Figure 2.

6.2 GENERAL SUBJECT PROPERTY SETTING

The Subject Property consists of one parcel of land located 41 Bellis Circle in Cambridge, MA. The Subject Property is occupied by a parking lot associated with the adjacent Montessori school. Adjoining property land use at the time of Kleinfelder's assessment appeared to be primarily residential properties and a school.

6.3 SUBJECT PROPERTY OBSERVATIONS

Kleinfelder's Subject Property observations are summarized in Table 6-1. Significant features are depicted on Figure 3.

© 2023 Kleinfelder

TABLE 6-1
Subject Property Observations

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current use	Parking lot	X	
Past use			X
Structures			X
Roads	The Subject Property is bordered to the east by Sherman Street and to the south by Bellis Circle	X	
Topography of Subject Property and surrounding area	The Subject Property is flat.	X

7.0 INTERVIEWS

Key Subject Property Managers are contacted to obtain current and historical environmental information concerning the Subject Property. The following sections highlight information revealed during the interviews.

7.1 INTERVIEW WITH CLIENT / OWNER

The User Questionnaire was completed by Ms. Katherine Watkins, Commissioner for the City of Cambridge Department of Public Works (Appendix C). The responses indicated the following:

- This Phase I ESA is being performed as part of a property acquisition.
- She is unaware of environmental liens against the Subject Property found in a search.
- She is unaware of any Activity and Use Limitations for the Subject Property.
- She does not have specialized knowledge or experience related to the property or nearby properties.
- She has knowledge of a RAM Plan submitted in 2016 for petroleum impacted soils but is not aware of any other information regarding releases at the Subject Property.
- She is not aware of prior land use of the Subject Property.
- To her knowledge, she is not aware that there has been a prior environmental assessment that indicated the presence of hazardous substances, petroleum hydrocarbons, contaminants, or recommended further assessments.

7.2 INTERVIEW WITH OCCUPANT(S)

The Owner Questionnaire was completed by Mr. William Senne (Appendix C). The responses indicated the following:

- Mr. Senne has no knowledge of the Subject Property or any adjoining property's historical use beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge if hazardous substances previously used at the Subject Property beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne indicated that a prior owner of the Subject Property is Cambridge Montessori School
- Mr. Senne has no knowledge of prior structures on the Subject Property, their purposes or durations beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge of prior oil or hazardous materials use and/or storage at the Subject Property beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge of any private wells or non-public water or septic system with tank and leaching field servicing the Subject Property beyond what was provided in a previous Phase I prepared by Arcadia.

© 2023 Kleinfelder

- Mr. Senne has no knowledge of any oil/gas wells or oil/gas vents located on the Subject Property beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge of any discharge of wastewater from the Subject Property to the sanitary sewer or storm water sewer system beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge of any environmental clean-up, environmental liens, violations, lawsuits, deed restrictions or prior environmental assessments indicating the presence of hazardous substances, petroleum hydrocarbon contaminants or that recommended further assessment beyond what was provided in a previous Phase I prepared by Arcadia.
- Mr. Senne has no knowledge of prior use of the Subject Property for agricultural purposes or the use of pesticides or fertilizers.
- Mr. Senne has no knowledge of any buried pipelines for irrigation or other purposes beyond what was provided in a previous Phase I prepared by Arcadia.

7.3 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Regulatory agency communication was summarized Section 4.3.

© 2023 Kleinfelder

8.0 EVALUATION

Kleinfelder performed this Phase I ESA of the Subject Property in conformance with the scope and limitations of the ASTM Standard Practice and the proposed scope of services subsequently approved by City of Cambridge on July 3, 2023. The following sections describe Kleinfelder's findings and provide general background information about the Subject Property. Findings address RECs, HRECs, CRECs, BERs, and notation of *de minimis* quantities, as applicable to the Subject Property. In summary, Kleinfelder's assessment revealed the following information concerning the Subject Property:

8.1 BACKGROUND

The following is a summary of the Subject Property background information:

- The Subject Property is situated on approximately ± 0.93 acres of land identified by the City of Cambridge Assessor's Office as Property ID 271-44 and is currently developed as a parking lot associated with the adjacent Montessori school. The Subject Property is located at 41 Bellis Circle in Cambridge, MA.

- Records indicate that the Subject Property was historically associated with West Cambridge Depot in the late 1800s and early 1900s. Sometime between 1900 and 1935 Diamond Coal Company occupied the parcel until circa 1969. Evidence of the demolition of the structures associated with Diamond Coal Company occurred in the 1970s and the property was vacant land until it was developed into a parking lot in the late 1980s.

8.2 FINDINGS AND OPINIONS

The following is a summary of findings and opinions for the Subject Property and vicinity:

- Based on Sanborn Fire Insurance Maps, two railroad spurs were located on the Subject Property from the early 1900s to at least the mid-1980s.
- City of Cambridge records indicate that a small structure (approximately 15 feet by 30 feet) was demolished in 2014; however, aerial photographs and Sanborn Fire Insurance Maps do not depict any structures on the Subject Property after circa 1980.
- The Subject Property is listed in multiple databases searched by EDR including the MA SHWS and MA Release databases. According to the MassDEP files, one release was reported for the Subject Property in August 2016 following a Phase II ESA investigation that detected petroleum hydrocarbons in soil above the applicable RCS-1. A total of 2,892.76 tons of petroleum impacted soil was subsequently excavated under a RAM Plan in August 2016 following further subsurface investigation. A PSNC was submitted to the MassDEP in October 2016 following post remedial soil sampling and groundwater monitoring.

© 2023 Kleinfelder

- During the investigation associated with RTN 3-33725, PAHs commonly found in historic fill material were also identified above RCS-1. Field observations of soil noted the presence of coal and coal ash thus MassDEP was not notified per 310 CMR 40.0317(9).
- The Subject Property was also listed in the MA ASBESTOS database when a pre-demolition asbestos survey conducted in March 2014 identified chrysotile asbestos in boiler insulation, transite panels and 9-inch by 9-inch floor tile. Approximately 90 square feet of asbestos was removed in June 2014under a MassDEP Asbestos Notification.
- Records received from the Cambridge Fire Department included a permit to remove a 275 gallon No. 2 fuel oil AST from the Subject Property in July 2015. No further information regarding the removal of the AST was available.
- Areas of minor surface staining was observed on the asphalt pavement at the Subject Property. The pavement in the areas of staining appeared to be in good condition with no evidence of significant cracks.
- A small, locked storage bin was noted in the southern portion of the Subject Property. The contents of the storage bin are unknown.
- Two large pavement cuts were observed at the Subject Property. Based on information reviewed on MassDEP's website, these are likely related to the excavation conducted under RTN 3-33725.
- An area of stressed vegetation was observed in the northern portion of the Subject Property.
- The adjacent property to the north at 147 Sherman Street, across the railroad tracks, has two RTN's with the MassDEP. RTN 3-14286 was assigned in 1996 and is associated with the presence of chlorinated VOCs in groundwater in the eastern portion of the property. RTN 3-33114 was assigned in 2015 and is associated with a two hour notification due to the release of hydraulic fluid to asphalt pavement. Both RTNs were closed with Permanent Solution reports. The closure of RTN 3-14286 was contingent upon the implementation of an AUL for the continued operation of a SSDS within the building.

8.3 DEVIATIONS AND ADDITIONAL SERVICES

Kleinfelder's scope of services did not include ASTM Standard Practice non-scope evaluations of cultural, historic, biological, wetlands, and archaeological resources and environmental regulatory compliance. In addition, the Phase I ESA did not include an assessment for lead in drinking water, indoor air quality, industrial hygiene, health and safety, and other ASTM Standard Practice non-scope considerations not described herein.

© 2023 Kleinfelder

8.4 CONCLUSIONS

Kleinfelder has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property located at 41 Bellis Circle in Cambridge, MA. Any exceptions to, or deletions from, this practice are described in Section 8.3 of this report. This assessment has revealed no evidence of RECs, or CRECs for the Subject Property except for the following HREC:

- RTN 3-33725 was assigned to the Subject Property in 2016 due to the presence of petroleum hydrocarbons in soil. Soil and groundwater assessment was conducted, followed by a remedial excavation under a RAM Plan. Following excavation and subsequent post-remedial assessment, a Method 1 Risk Characterization was performed and results determined that a condition of No Significant Risk existed and a PSNC was submitted. RTN 3-33725 represents an HREC.

The following *de minimis* environmental condition was identified:

- The observed staining on the asphalt/concrete pavement at the Subject Property is considered a *de minimis* environmental condition. The staining was localized, and the pavement appeared to be in good condition, with no obvious signs of significant cracks.

The following BERs were identified for the Subject Property:

- PAHs associated with historic fill material were identified during the supplemental Phase II investigation at the Subject Property. Based on the observation of coal and coal ash in soil during drilling activities, these PAHs were not reported to the MassDEP due to the historic fill exemption.

In addition to these conditions, deviations from the Phase I ESA Standard (if any) are discussed in Section 8 of this report. This report is subject to the limitations in Section 2.5.

8.5 RECOMMENDATIONS

Based on the findings and conclusions of this Phase I ESA, Kleinfelder has the following recommendations:

- Although the contamination associated with the former release was remediated to the satisfaction of the regulatory agency, residual contamination associated with the release is likely to be present. Kleinfelder recommends that if soil may be disturbed and/or groundwater anticipated to be encountered during future construction activities, a subsurface assessment should be performed to assess current conditions at that time.
- Although not considered a REC, anthropogenic fill was identified in soil samples collected during a previous assessment conducted by others at the Subject Property. The presence of historic fill material represents a potential environmental concern. Based on the developmental history of Cambridge, historic fill material has been noted throughout the

© 2023 Kleinfelder

City. Based on the presence of contaminated historical fill material, any property redevelopment that involves the disturbance of fill material should be conducted under a RAM Plan and any soil should be managed as Remediation Waste.

8.6 DATA GAPS

Data gaps, which may affect the identification of hazardous substances or petroleum products for the evaluation of RECs at the Subject Property, include the following:

- Gaps greater than 10 years between historical aerial photographs, Sanborn Fire Insurance Maps and historical topographic maps.

Based on a review of other information available for the Subject Property, the absence of information from the above listed sources are not considered significant data gaps based on other information reviewed as part of this Phase I ESA.

STATEMENT OF QUALIFICATIONS AND RESUMES

STATEMENT OF QUALIFICATIONS

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in CFR Part 312.

Lisa Stone

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/26/2023 has revealed that there are 7 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 8 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

MA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Solid Waste Facility Database/Transfer Stations.

A review of the MA SWF/LF list, as provided by EDR, has revealed that there are 2 MA SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal brownfield sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there is 1 MA BROWNFIELDS site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

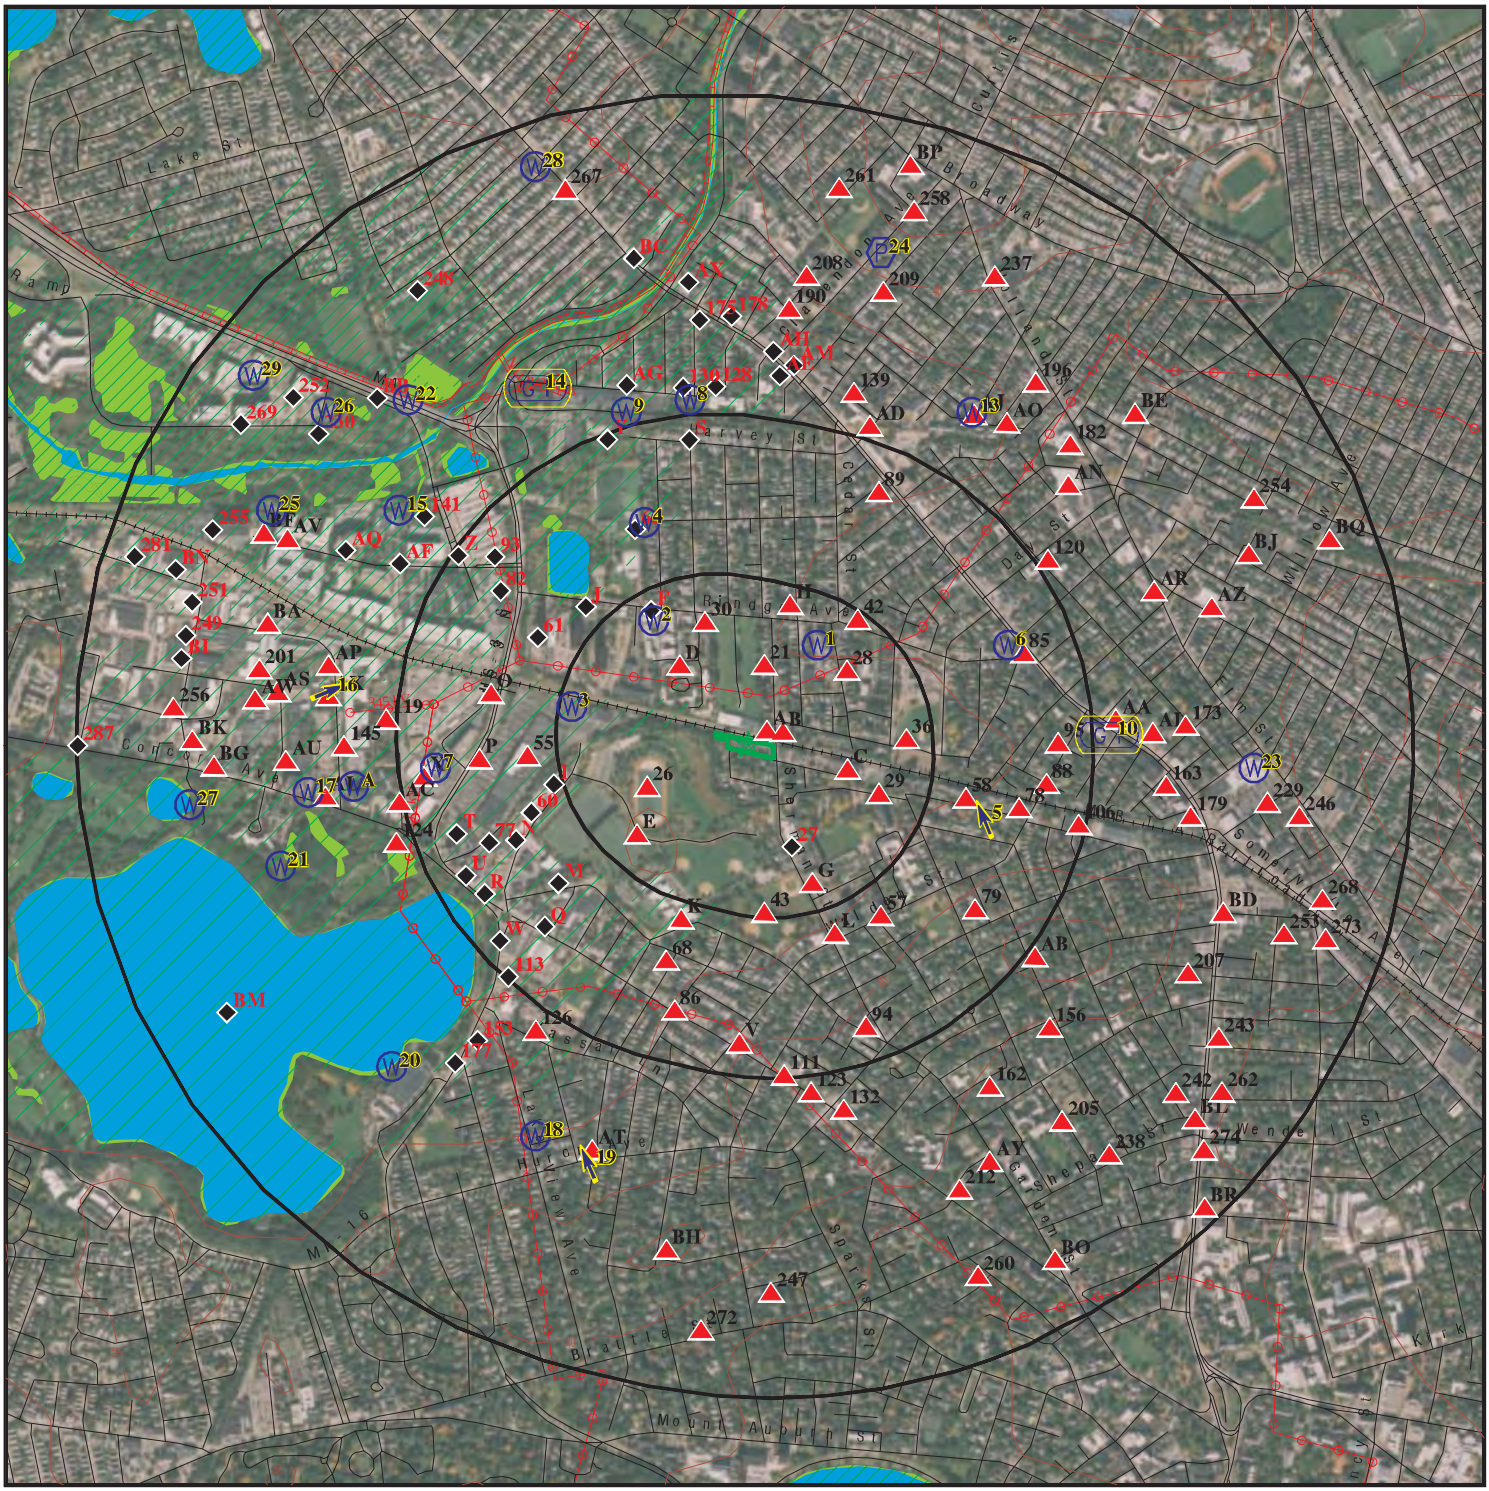
EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.



Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CHIPPEWA AGRICULTURA	85 BOLTON ST	ESE 0 - 1/8 (0.117 mi.)	C20	99

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 58 records.

Site Name	Database(s)
THE RESIDENCES AT ALEWIFE STATION	MA SHWS, MA LUST, MA RELEASE, MA ENF
STATION 830	MA SHWS, MA RELEASE
FRESH POND PARKING LOT	MA SHWS, MA RELEASE
50 CAMBRIDGEPARK DRIVE	MA SHWS, MA RELEASE

Hazardous Waste Summary:

Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F004
Waste Description:	The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above

TELEDYNE CRYSTALONIC (Continued) **1000201721**

Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before

ACTNANO INC (Continued) **1024882245**

Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Fac status: OPEN

Tank ID: 1
Tank Status: In Use
Status Date: Not reported
Date Installed: 08/01/1988
Capacity: 8000.00000
Contents: Gasoline
Tank Usage: Motor Vehi
Tank Leak Detection: Continuous In-Tank Monitoring System
Pipe Leak Detection: Annual Automatic Line Leak Detection Test
Latitude: Not reported
Longitude: Not reported
Tank construct: Double-walled non-corrodible (including "composite") material (cathodic protection not required)
Pipe construct: Single-walled non-corrodible material (No corrosion protection required)
Ptype: Pressurized piping system with mechanical automatic line leak detection
Number of compartment: Not reported
Pipe install date: 08/01/1988
Pipe leak install date: 08/01/1988
Submersible sump: Y
Submersible sump install date: 08/01/1988

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
MA-EPICS - Massachussetts Environmental Protection Integrated Computer System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
