

Broadway Safety Improvement Project

Separated Bike Lanes and Other Safety Improvements
from Quincy St. to Portland St.

Street Layout Changes

The City of Cambridge will add separated bike lanes and make related safety improvements on Broadway. We will:

Install separated bike lanes:

This refers to bike lanes along the curb, separated from vehicles by white flex-posts or other physical barriers.

Add traffic calming:

Changes for people walking and taking the bus: Bus stop locations may change, and pedestrian safety enhancements will improve crosswalks.

Reduce parking:

This project will reduce on-street parking. We haven't finished design, but we hope to maintain about 40% of the current spaces with parking on one side of the street

City Hall Annex, Second Floor
344 Broadway

Broadway Safety Improvement Project

The City of Cambridge plans to add separated bike lanes and make related safety improvements on Broadway. What do we know about the project so far?

What Will Change?

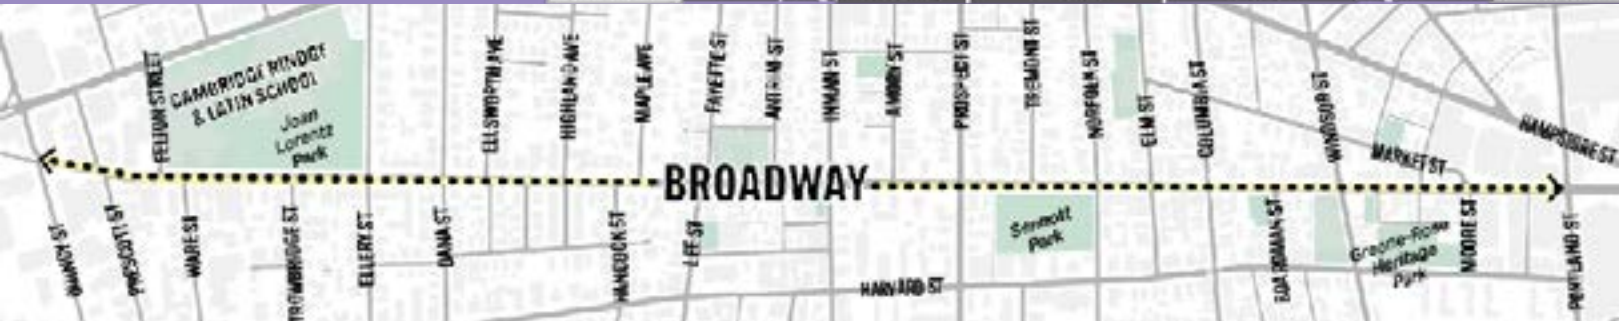

Improved safety for all users, separated bike lanes, and reduced parking along the corridor

Proposed Street Layout

With one-side street parking and one way bike lanes on each side.

Project Area Map

The project area is between Quincy St to Portland St on Broadway.

Reduced On-Street Parking

This project will reduce on-street parking. We haven't finished design, but we hope to maintain about 40% of the current spaces.

Separated Bike Lanes

We will move bike lanes against the curb and separate them from moving vehicles with white flex posts.
