RE: File No. 11614 – FY25 Specialized Sidewalk Improvements Contract - Addendum No. 1

This addendum is comprised of the following:

- 1. Question and Answer**

The following question was asked and answered:

Question: Please clarify is the quantity 1000 inches of cutting or 1000 feet?

Response: The unit of measurement and the calculation is written in the contract; the unit is inch-foot and is calculated below through an example.

“Inch-feet shall be calculated by multiplying the average depth of the cut by the width of the cut.

Example: If a trip hazard is cut 1" on one side and tapered to 0" on the other' side of a full 4-foot width sidewalk, it shall be calculated as follows:

$(1" + 0") / 2 \times 4' = 2$ inch-feet

$2 \times \text{price per inch foot} = \$ \text{total cost of trip hazard}$ ”

All other details remain the same.
