Pelity

2024 Resident Opinion Survey Prepared for The City of Cambridge, MA

November 1, 2024 Polity Research Consulting LLC

Methodology

Polity Research Consulting conducted a random telephone survey among 400 adult residents of the city of Cambridge, Massachusetts between September 11th and September 17th 2024. The sample was constructed to represent the adult population of the City—and was comprised of *both* landline and cell-phone households. The margin of error on the full, 400-member sample is ±4.90% at the mid-range of the 95% confidence interval. That is, when conducting 100 such surveys, 95 of them will yield results that fall—at worst—4.9 points on either side of a given percentage. When looking at smaller segments of the sample, margins of error will *increase*.

Executive Summary Of Key Findings

All in all, the results of this survey indicate that Cambridge residents continue to express *overall* positive attitudes towards a range of measures dealing with Cambridge City Government. In fact, on most measures, combined positive assessments closely match those we saw in 2023. *However*, we also see a lessening of attitudes on the positive *extremes*—like "excellence" and strong "satisfaction". Interestingly, several results mirror those we saw in pre-COVID surveys—suggesting that residents may be re-focusing on broader issues—and examining them more carefully. For example:

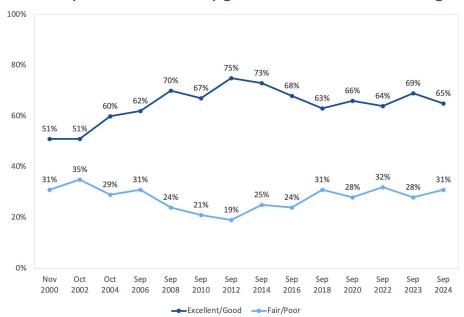

- "Excellent" ratings for City government performance currently stand at 15%—similar to the 16% we saw in both 2018 and 2020. *However*, 2022's "excellent" number was 21% and 2023's was 22%—the higher ratings then perhaps (at least partly) reflecting the City's handling of COVID during those years.
- It's important to note that this drop in "excellent" ratings has *not* (for the most part) translated into an increase in *negative* ratings. On most measures, the shift has gone from 'excellent' to 'good". For example, even with the drop in "excellent" ratings on City government performance, the *combined* "excellent" and "good" numbers total 65%, while the 2023 combined result was 69%—right at the survey's 4-point margin of error.
- Our Gap Analysis indicates areas where the most work needs to be done by the City.. The results show higher values (i.e., the biggest gaps between importance and performance) on the two affordable housing questions (1.86 mean difference on market housing; 1.48 on subsidized housing). Other large negative gaps exist on: the quality of transportation (1.16), the balance between construction and preservation (0.79), and informing residents (0.65). The lone *positive* gap exists on the question of cultural opportunities (-0.12). Other small *negative* gaps were on: quality of open space (0.12), safe streets (0.34) and connection and engagement with the community (0.37).
- When this Gap Analysis is expressed as a 'perceptual map', we find that **just three items fall in the "negative" quadrant** (i.e., both important *and* underperforming). The three items are: 1.) affordable market housing; 2.) affordable subsidized housing; 3.) balance between new construction and neighborhood preservation.

- Solid majorities continue to say they'd be very likely to recommend living in Cambridge and very likely to stay in Cambridge for five years (56% "very likely" for both).
- Most City Departments tested also show a drop in "excellent" ratings—although, again, combined "excellent" and "good" responses closely matched the 2023 numbers in most cases.
- City of Cambridge email updates, printed mailers and website continue to be the most valuable sources of information for residents (47% very valuable). Word of Mouth is again second in value (37%), while online and print newspapers have shown an increase in value over 2023 (34% now, 28% in 2023).
- Traveling the City on foot remains the best option for residents, followed by bicycling, public transit and taxi/ride-share. And, by a wide margin, residents continue to urge the City to focus on public transportation.
- All in all, while Cambridge residents continue to assign positive marks to most city-related measures, they also seem less likely to assign *highly* positive assessments to City performance and services.

City Government Performance Rating

As the chart shows, almost two-thirds of residents (65%) give the city either "excellent" or "good" marks on the overall performance of city government in Cambridge—although this represents a 4-point *decrease* from the 2023 score. Moreover, 15% now assign "excellent" ratings to overall performance—also down from 22% in 2023. These "excellent" levels are close to the levels we saw in the pre-COVID year of 2018.

Overall performance of City government here in Cambridge

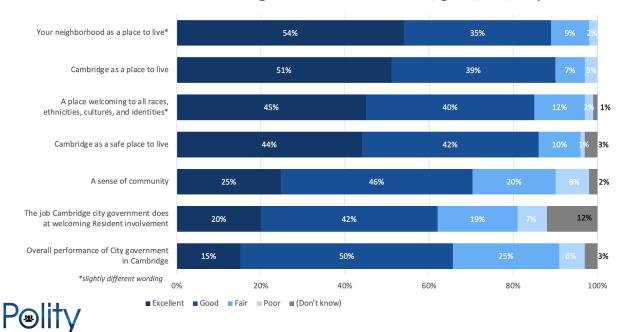

Pelity

Demographically, the tendency to assign "excellent" ratings to the city comes most often from: men and women equally, people aged 45-54, residents with household incomes over \$100,000, residents of Zip Code 02139. "Poor" ratings are most likely to come from Hispanic residents, people aged 56-64, those living in Zip Code 02141 and 02142, and longer-term residents.

Overall City Attribute Ratings

Respondents were also asked to rate a range of city attributes. As the chart shows, residents continue to assign the highest "excellent" ratings to their **neighborhood being a safe place to live** (54%, down slightly from 59% in 2023), followed by **the city overall as a place to live** (51% excellent); the **city as a welcoming place** (45% excellent); **Cambridge as a safe place to live** (44% excellent); **a sense of community** (25% excellent); and **overall performance of the city government** (15% excellent). A new question asks about **city government "welcoming resident involvement"** garners 20% "excellent" marks.

Please rate the following on a scale of excellent, good, fair, or poor.

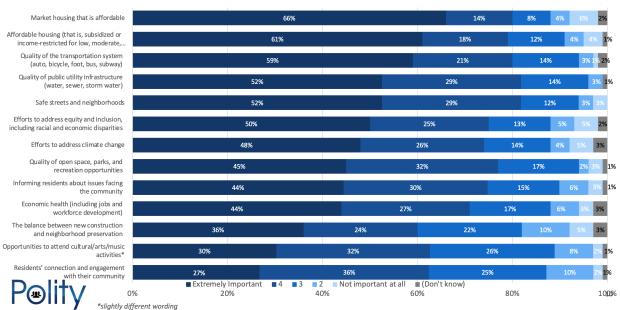

Importance/Performance Gap Analysis And Perceptual Mapping

Again this year, respondents were asked to rate a listing of 13 aspects of the community on two separate scales—first a "1" to "5" *importance* scale and next a "1" to "5" *performance* scale. We then analyzed the *mean score results* to construct a Gap Analysis—showing areas that the City performs well on and areas that need improvements.

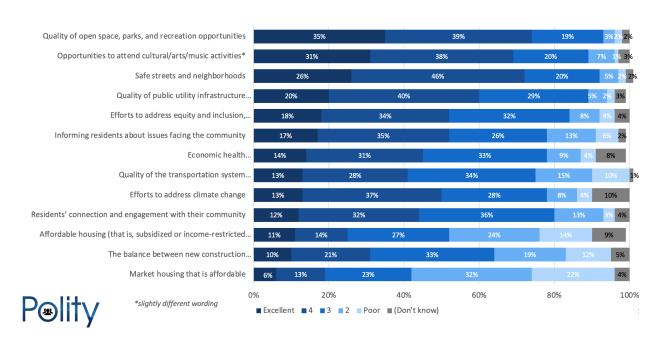

First, here are the overall results to the *importance* ratings. As the chart shows, *both* affordable housing measures continue to garner the highest percentages of "extremely important" ratings (66% "market" and 61% "subsidized"). Interestingly—as we saw in 2023—the quality of the transportation system (at 59% "extremely" important) is next in line of importance. The importance list continues with: quality of public utility infrastructure (52% "extremely" important); safe streets and neighborhoods (52%); efforts to address equity and inclusion (50%); efforts to address climate change (48%); economic health (44%); quality of open space/recreation (45%); construction-preservation balance (36%); opportunities in education/culture/arts (30%); connection and engagement with the community (27%). A new question was added to the mix this year asking about informing residents about issues facing the community—which received 44% extreme importance.

Next, are the overall results to the *performance* ratings. As we saw in 2023, quality of open space/recreation tops the performance list—with 35% assigning "excellent" ratings to the City. Opportunities in education/culture/arts finishes second on the list (31% "excellent" ratings). 'Excellent' City performance continued on: safe streets and neighborhoods (26%); quality of public utility infrastructure (20%); efforts to address equity and inclusion (18%); economic health (14%—down from 17% in 2023); efforts to address climate change (13%—up from 9% in 2023); quality of transportation system (13%—down from 18 in 2023); engagement with the community (12%, down from 14% in 2023); subsidized affordable housing (11%—up from 9% in 2023); construction/preservation balance (10%—down from 13% in 2023); market affordable housing (6%). The new question about informing residents about issues facing the community—garnered 17% 'excellent' ratings.

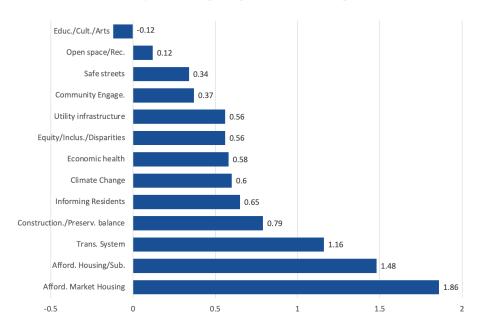

Please rate how well the City of Cambridge performs on each of these.

Next, we calculated the *mean scores* of all the importance/performance measures and matched them up with one another. We find that (not surprisingly) the two affordable housing measures show the biggest negative gaps between importance and performance (2.01 "market", 1.61 "subsidized"). Interestingly, transportation system issues show the next biggest gap (1.13), followed by construction/preservation balance (0.76), equity efforts (0.70), climate change efforts (0.70); economic health (0.64); public utility infrastructure (0.59); resident engagement (0.49); safe streets (0.44); education/culture/arts (0.23); open space (0.10).

The bottom line is that the community aspects at the *top* of the Gap Analysis "pyramid" are relatively important to residents *and* the City is performing *well* on them. Conversely, those on the bottom of the pyramid are relatively important to residents and the City is performing *less well* on them. This would suggest that follow-up research be targeted on issues like housing, transportation, the balance between construction and preservation, and informing residents about issues facing the community.

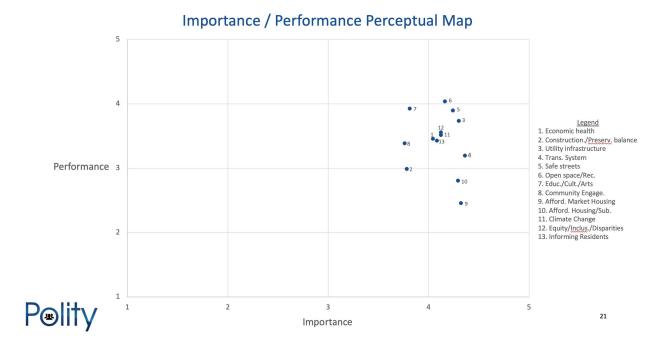

Importance/Performance Gap Ranking (higher number=greater attention needed)

Pelity

Another way of looking at this issue is by use of a "perceptual map"—which plots the relative mean scores of the community aspects on a matrix of importance and performance. Aspects in the upper right-hand quadrant of the map represent areas where the City is performing well on areas residents consider to be important. Aspects in the lower right-hand quadrant represent those where the City performance needs improvement on issues that are important to residents.

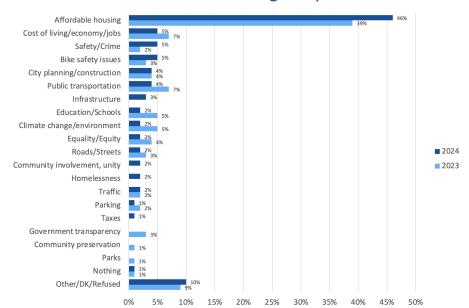

Again, the affordable housing issues are clearly in need of improved performance by the City—while transportation and preservation issues are also trending in a negative direction when using this perceptual map methodology

Most Important Issues Needing City Attention

Respondents were also asked to tell us—in their own words—what they think is the single most important issue that the City if Cambridge needs to focus on in the next *two* years. As the chart shows, affordable housing *once again* tops the list—now comprising almost half of all responses (46%). Far behind on the list are: cost of living (5%), safety/crime (5%—although *up from 2% in 2023*); bike safety issues (5%—also up from 3% in 2023); city planning/construction (4%); public transportation (4%—down from 7% in 2023); infrastructure (3%); education/schools (2%—down from 5% in 2023). A full listing of coded, open-ended responses follows.

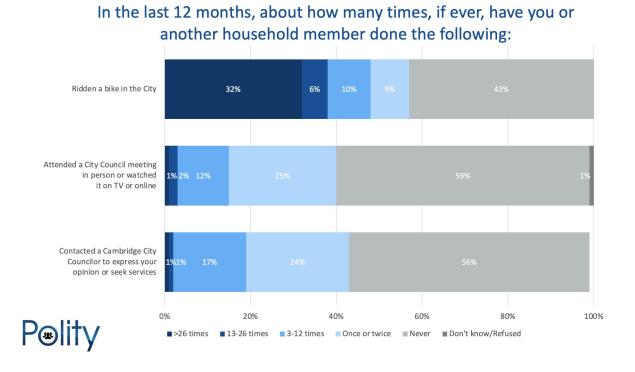

What is the *single most important* issue the City of Cambridge should focus on in the coming two years?

Frequency Of Activities

As in past surveys, respondents were asked to tell us how many times they had participated in a range of activities in the city *over the last 12 months*. As the chart shows, the percentage of residents who have **ridden a bike** more than 26 times now stands at 32%—up two percent since 2023. The percentage who say they have "never" **attended a City Council meeting** is now 59%—up four percent from 2023. And, the percentage of residents who have *never* contacted a Cambridge City Councilor is 56%—down from 60% in 2023.

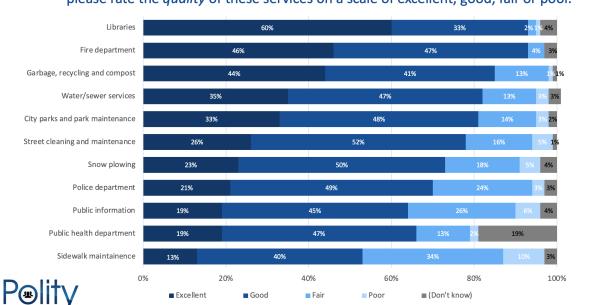

Respondents were asked to rate a range of City services on a scale of "excellent" to "poor". As we have seen with other measures this year, "excellent" ratings have dropped for a number of departments. For example: **public information** (down 10 points); **library services** (down 6 points); **public health department** (down 6 points); **garbage recycling and compost** (down 6 points); **fire department services** (down 5 points); **police department** (down 4 points).

Smaller drops in "excellent" ratings occurred on: **street cleaning and maintenance** (down 3 points) and **city parks and maintenance** (down 2 points).

Bucking the overall downward trend were *increases* in 'excellent' ratings for: water/sewer services (up 6 points, after rising 3 points in 2023) and sidewalk maintenance (up 1 point). Snow plowing held steady at 23% excellent).

In terms of overall "excellent" scores, the top three were: libraries (60%); Fire Department services (46%); garbage, compost and recycling (44%).

Now, I'd like to read you a <u>number of</u> services provided by the City of Cambridge. For each one, please rate the *quality* of these services on a scale of excellent, good, fair or poor.

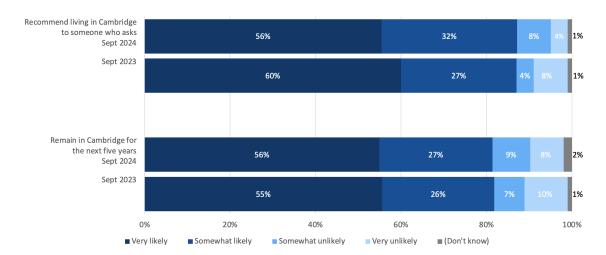

Demographic analysis on the "public information" measure shows that the tendency to assign "excellent" ratings comes most often from: women, those aged 35-44, residents with a bachelor's degree, residents of 5-10 years and those living in Zip Code 02139. Less favorable view of public information tend to come from among: people aged 18-24, Black and Asian residents, students and those living in Zip Code 02141.

City Pride, Resident Intentions And Recommendations

24

As we did last year, we asked respondents two questions that reflect their level of pride in the City of Cambridge. First, we measured the likelihood that residents would "recommend" living in the city to someone who asked them. As the table shows, 56% of residents (down from 60% in 2023) say they are "very likely" to make that recommendation. Exactly the same number (56%) say they are "very likely" to "remain in Cambridge for the next five years".

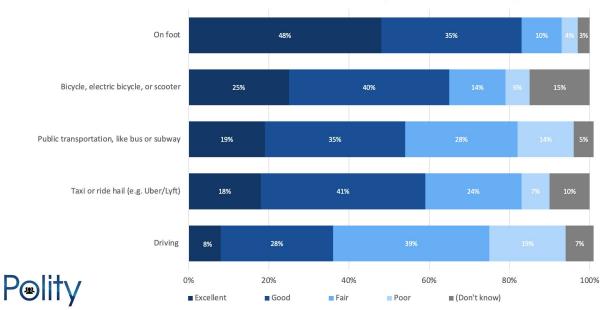

Please tell me how likely you'd be to do each of the following—very likely, somewhat likely, somewhat unlikely, or very unlikely.

As the following chart indicates, Cambridge residents continue to view walking as the best method for getting around the city—with almost half (48%) rating that option as "excellent"—down from 52% in 2023. Bicycle riding is considered the nest best option (24% "excellent"—down from 30% in 2023). Further down the list of options is public bus or subway (19%—up from 16% in 2023), Taxi/Uber (18%), and driving (8%).

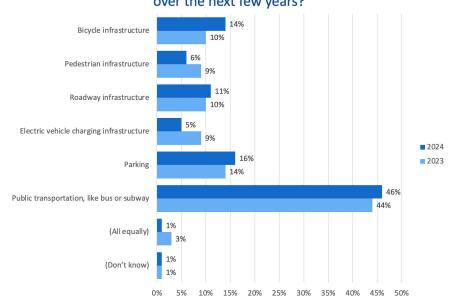

On a scale of excellent, good, fair or poor, please rate the ease of getting around the city for each of the following transportation options.

As we did last year, we asked residents which *single transportation option* is most important for the City to improve. As the chart shows, public transportation continues to top the list at 46%—

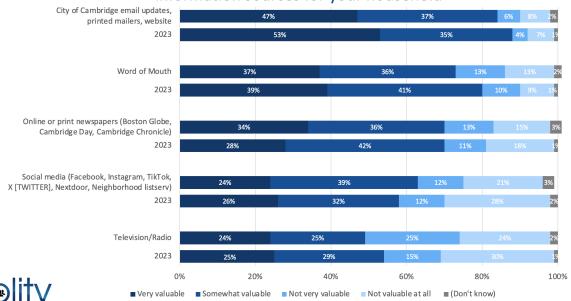

up 2 points from 2023. Parking comes in second place at 16%, followed by bicycle infrastructure at 14% (up from 10% in 2023) and roadway infrastructure at 11%.

As you continue to think about transportation options to get around Cambridge, which of the following do you think is the <u>single most important option</u> for the city to focus on improving over the next few years?

As the next chart shows, Cambridge residents continue to evaluate *official city information* sources (emails, mailers, city website) as the most valuable for their household (47% "very valuable"). Next on list are: word of mouth (37% "very valuable); online or print newspapers (34%—up from 28% in 2023), social media (24%) and television/radio (24%).

Demographically, residents who consider City communications to be "very valuable" tend to be: women, those aged 35-44, Asian residents, those with household incomes between \$100,000 and \$124,000 a year, the best-educated, those with children in the home, and shorter-term residents.

Now, I'd like to read you a number of services provided by the City of Cambridge. For each one, please rate the *quality* of these services on a scale of excellent, good, fair or poor.

SCALE:

- 1. Excellent
- 2. Good

3. Fair

- 4. Poor
- 5. (Don't know)

September 2024

Cambridge Resident Survey

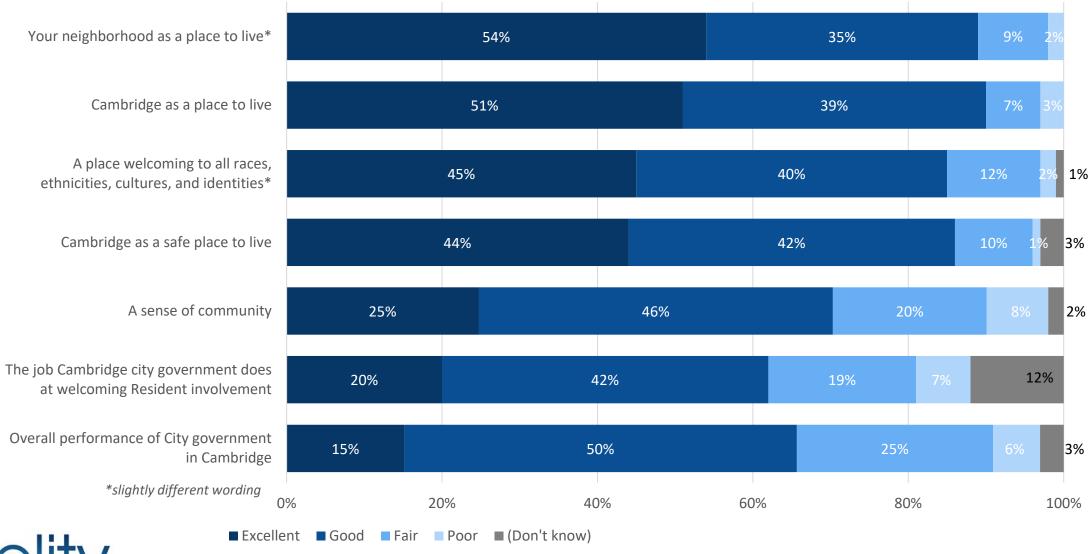

Executive Summary

All in all, the results of this survey indicate that Cambridge residents continue to express *overall* positive attitudes towards a range of measures dealing with Cambridge City Government. In fact, on most measures, combined positive assessments closely match those we saw in 2023. *However*, we also see a lessening of attitudes on the positive extremes—like "excellence" and strong "satisfaction". Interestingly, several results mirror those we saw in pre-COVID surveys—suggesting that residents may be re-focusing on broader issues—and examining them more carefully For example:

- The current "excellent" rating for City government performance stands at 15%—similar to the 16% we saw in both 2018 and 2020. However, in 2022, the "excellent" number was 21% and in 2023 it was 22%—perhaps (at least partly) reflecting the City's handling of COVID.
- It's important to note that this drop in "excellent" ratings has **not** (for the most part) translated into an increase in *negative* ratings. On most measures, the shift is from 'excellent' to 'good". For example, even with the drop in "excellent" ratings on City government performance, the *combined* "excellent" and "good" numbers total 65%, while the 2023 combined result was 69%—right at the survey's 4-point margin of error.
- Our Gap Analysis shows where higher values (i.e., the biggest gaps between importance and performance) indicate areas where the most work needs to be done. The results show the highest such values on the two affordable housing questions (1.86 mean difference on market housing; 1.48 on subsidized housing). Other large negative gaps exist on: the quality of transportation (1.16), the balance between construction and preservation (0.79), and informing residents (0.65). The lone *positive* gap exists on the question of cultural opportunities (-0.12). Other small *negative* gaps appear on: quality of open space (0.12), safe streets (0.34) and connection and engagement with the community (0.37).
- When this Gap Analysis is expressed as a 'perceptual map', we find that just three items fall in the "negative" quadrant (i.e., important *and* underperforming). The three items are: 1.) affordable market housing; 2.) affordable subsidized housing; 3.) balance between new construction and neighborhood preservation.
- Solid majorities continue to say they'd be very likely to recommend living in Cambridge and very likely to stay in Cambridge for five years (56% "very likely" for both).
- Most City Departments tested also show a drop in "excellent" ratings—although, again, combined "excellent" and "good" responses closely matched the 2023 numbers in most cases.
- City of Cambridge email updates, printed mailers and website continue to be the most valuable sources of information for residents (47% very valuable). Word of Mouth is again second in value (37%), while online and print newspapers have shown an increase in value over 2023 (34% now, 28% in 2023).
- Traveling the City on foot remains the best option for residents, followed by bicycling, public transit and taxi/ride-share. And, by a wide margin, residents continue to urge the City to focus on public transportation.
- All in all, Cambridge residents seem to have moved to a somewhat less positive assessment of City performance and services—although, for the most part, combined positive ratings still dominate on most key measures.

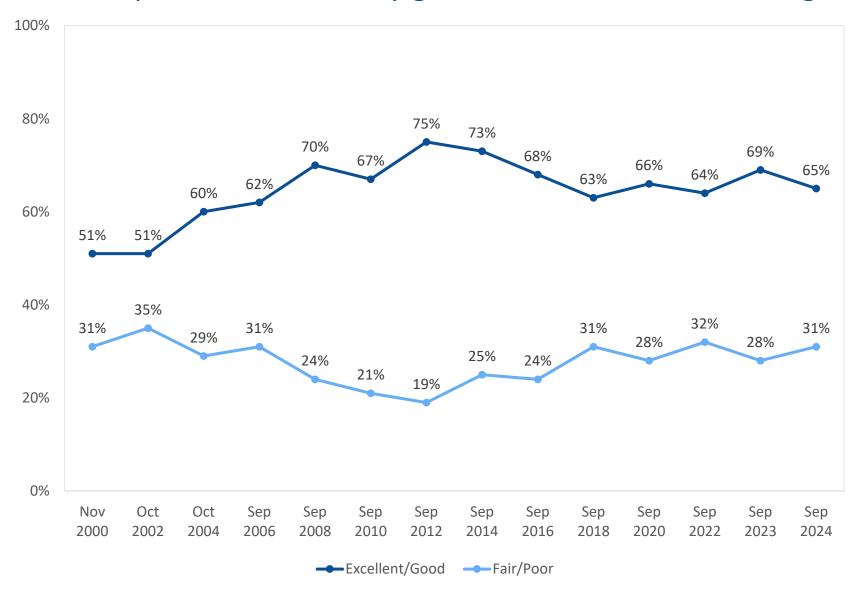

Please rate the following on a scale of excellent, good, fair, or poor.

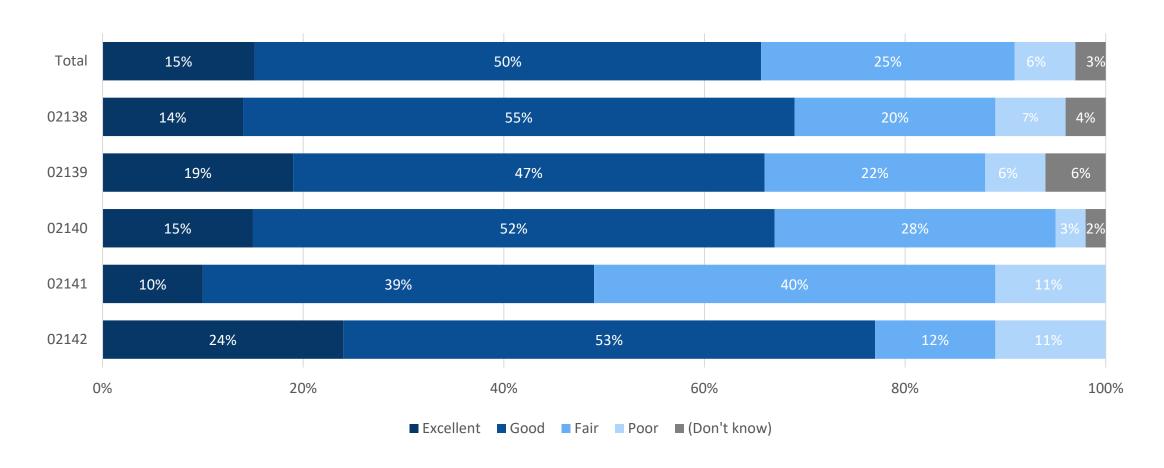

Overall performance of City government here in Cambridge

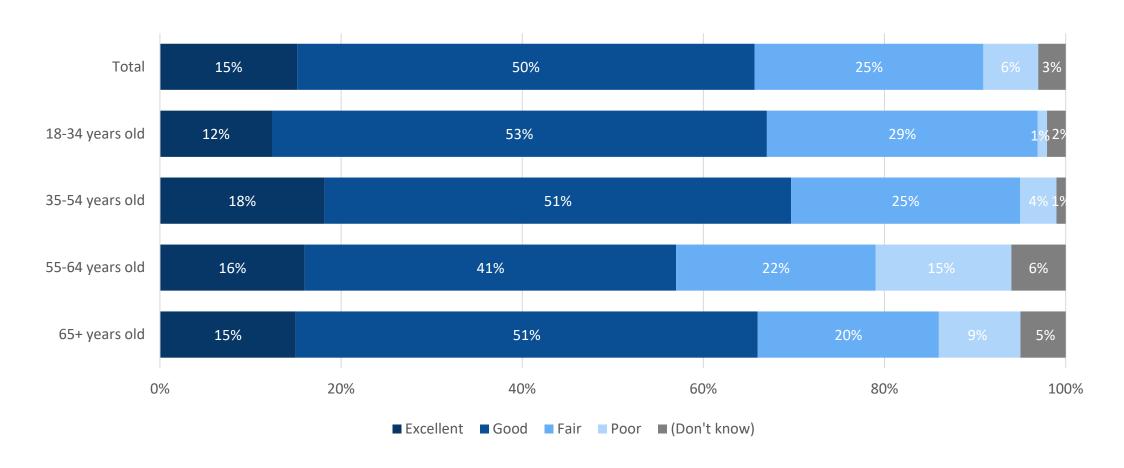

Overall performance of City government here in Cambridge By Area

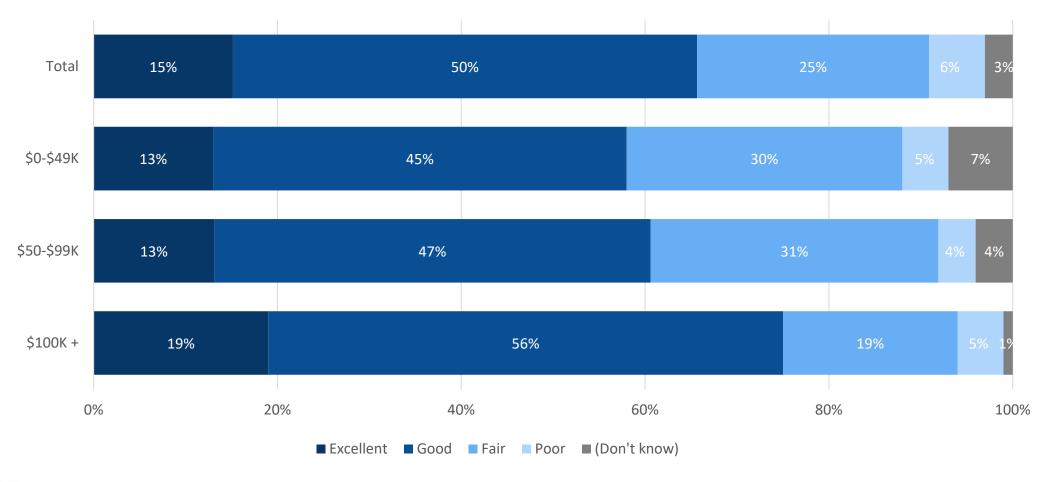

Overall performance of City government here in Cambridge By Age

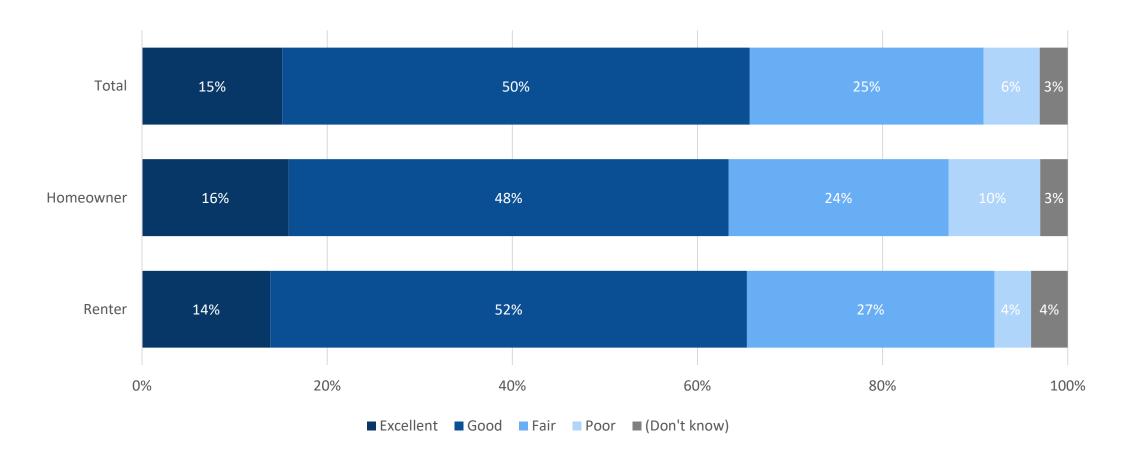

Overall performance of City government here in Cambridge By Income

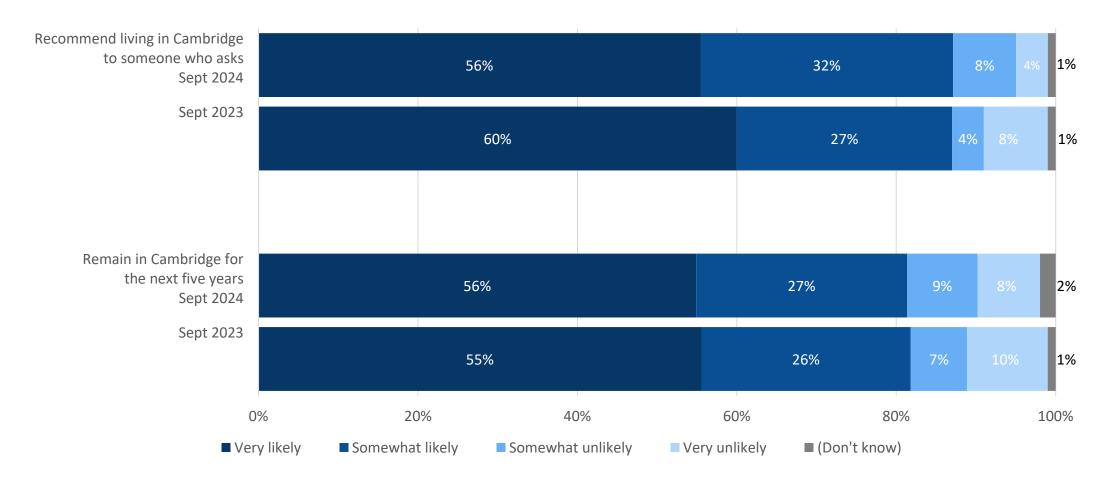

Overall performance of City government here in Cambridge By Homeowner / Renter

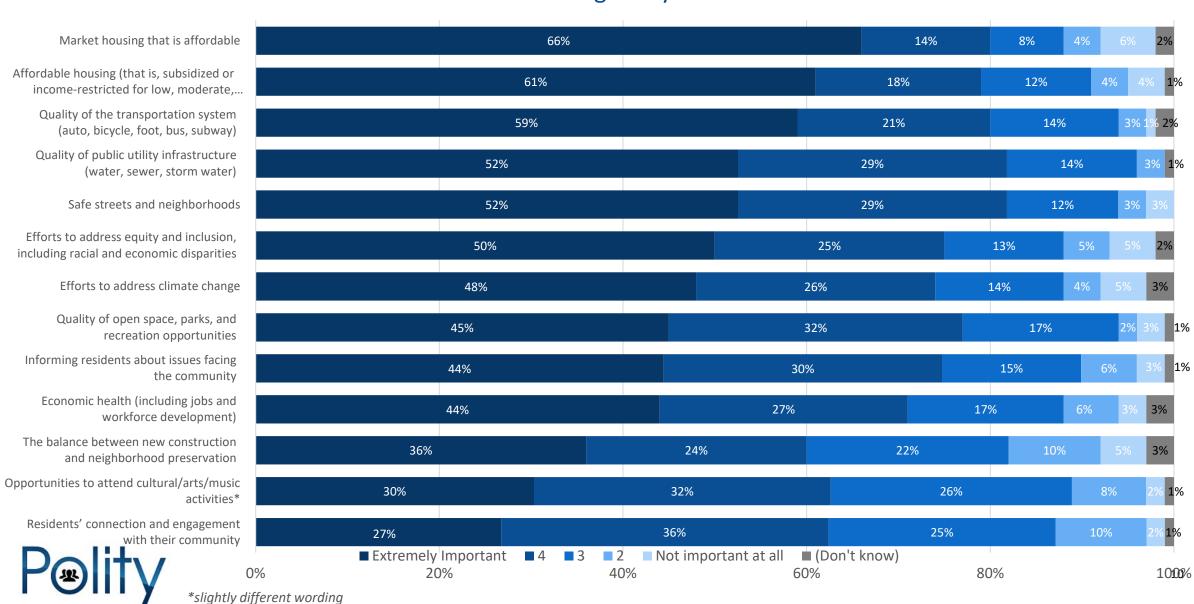

Please tell me how likely you'd be to do each of the following—very likely, somewhat likely, somewhat unlikely, or very unlikely.

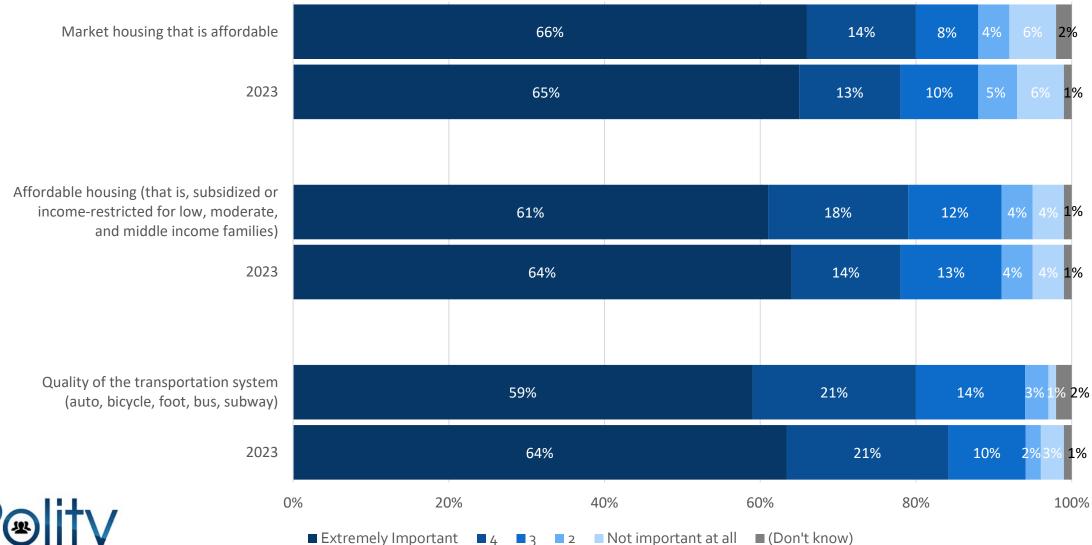

How important is it for the Cambridge community to focus on each of the following in the coming two years:

On a scale of excellent, good, fair or poor, please rate the ease of getting around the city for each of the following transportation options.

As you continue to think about transportation options to get around Cambridge, which of the following do you think is the <u>single most important option</u> for the city to focus on improving over the next few years?

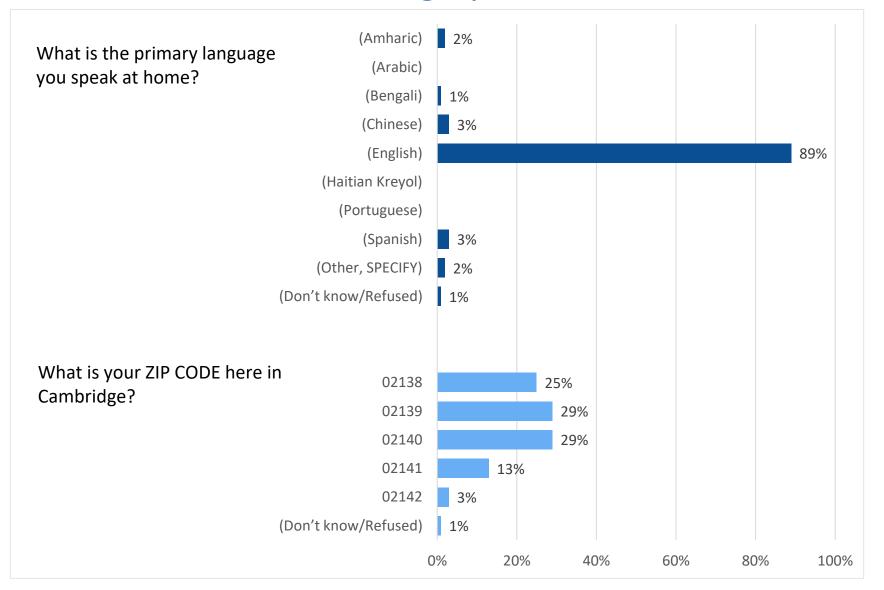

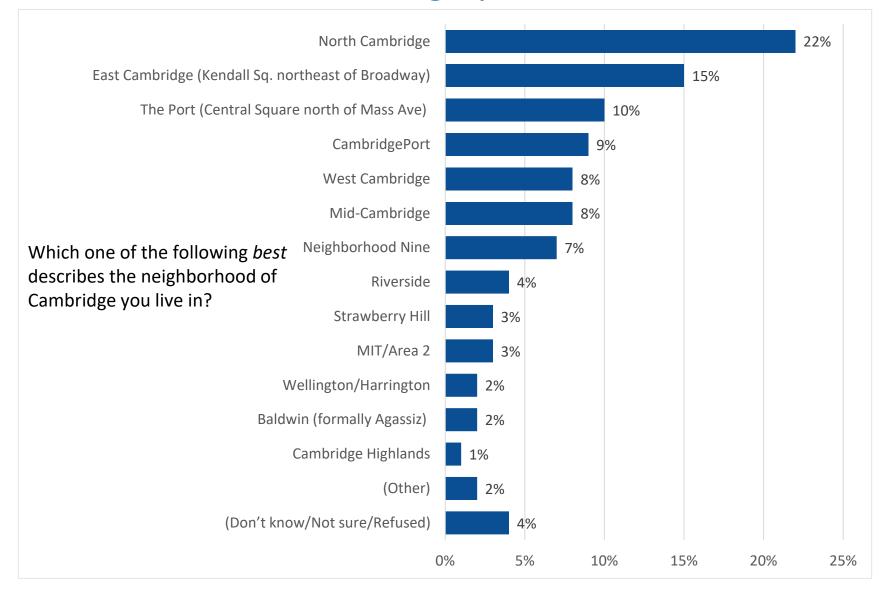

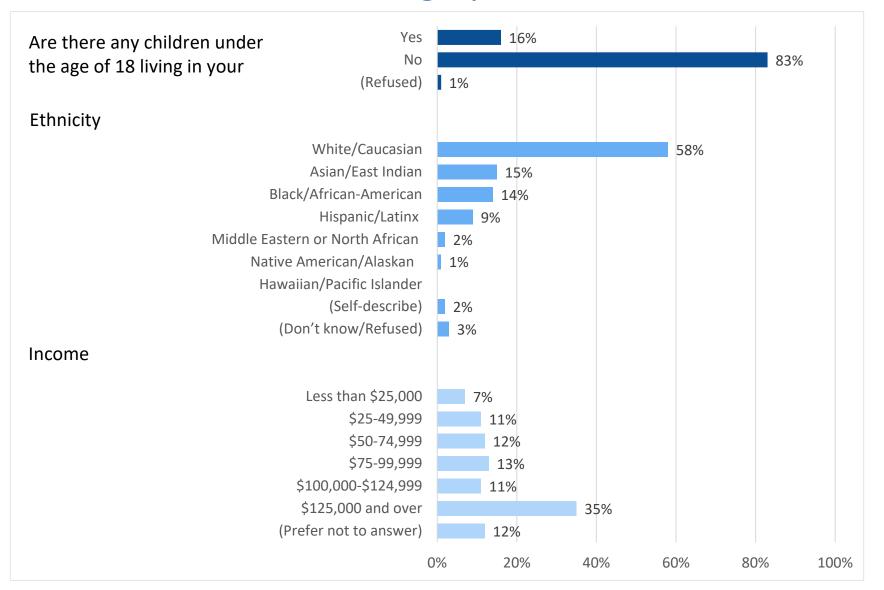

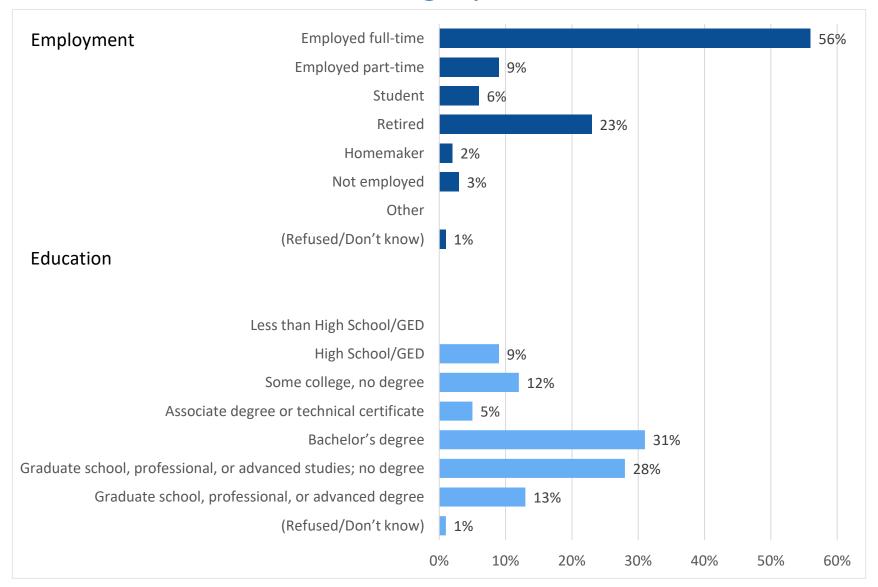

Cambridge, MA Public Opinion Survey

National Benchmark Comparisons

October 2024

Detailed Benchmark Comparisons

Comparison Data

Polco/National Research Center (NRC)'s database of comparative resident opinion comprises resident perspectives gathered in surveys from over 500 communities. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. Polco adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range.

Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Cambridge's "percent positive." The percent positive is the combination of the top two most positive response options (i.e., "excellent" and "good," "very safe" and "somewhat safe," "essential" and "very important," etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating "yes" or participating in an activity at least once a month. The second column is the rank assigned to Cambridge's rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Cambridge's rating to the benchmark.

In that final column, Cambridge's results are noted as being "higher" than the benchmark, "lower" than the benchmark or "similar" to the benchmark, meaning that the average rating given by residents is statistically similar to or different (greater or lesser) than the benchmark. Being rated as "higher" or "lower" than the benchmark means that Cambridge's average rating for a particular item was more than 10 points different than the benchmark. If a rating was "much higher" or "much lower," then Cambridge's average rating was more than 20 points different when compared to the benchmark.

National Benchmark Comparisons

Table 1: Quality of Life

Quality of Life Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Cambridge as a place to live	91%	182	349	Similar
Recommend living in Cambridge to someone who asks	90%	110	316	Similar
